Forceful Laxatives Are No Longer Necessary

If you are accustomed to using forceful
laxatives as cathartics, you can break
away from this habit and bring back
the loved action to a normal condition,
or nearly so, by the use of

Wampole's MAGNOLAX

In appearance and taste Magnolax is pleasant and
palatable. It is a subtle combination of Mineral
oil with Salt of Bisphosphate—combining the
virtues of both. It gently stimulates the
contents of the bowels causing natural excretion
without discomfort or grating.
Wampole's Magnolax mixes readily with milk,
and may be given in this way to infants and very
young children.

LOCAL ITEMS

Mr. and Mrs. W. H. Stepney, of
Alliance, were guests this week at
the home of Mr. and Mrs. W. A.
Hurley.

Last Friday in Chinook was a
very quiet day. A number of the
business men's wives had charge
of the stores while their respective
husbands were having a good time
at Langford U.F.A. sports. The
local ball team was present and
participated in the ball game. In
the evening another party of young
folks left Chinook to take in the
dance. All report a jolly time.

A. Kofod, of Winnipeg, was a
guest at the Chinook Hotel last
week.

Mrs. R. Srigley and little son
Ray, left Wednesday morning for
Mecheche where they will visit
relatives for a while previous to
going to Aldersyde where they
will make their home in the future.
Mr. Srigley has been appointed
manager of the U. G. G. elevator
at that point and will leave Chin-
ook about the end of the month.

John W. Poeckens, of Heath-
dale, purchased a new Ford Coupe
car last Saturday from Messrs.
Cooley Brothers.

Robt Stanley, of Hanna, was a
visitor in Chinook last Friday.

Mrs. W. W. Wilson, of Coll-
holme, met with a very painful
accident last Thursday, when she
got her hand caught in an electric
washing machine and broke a
blood vessel. She was rushed to
the Cerebral Hospital where she re-
ceived medical treatment. Mrs.
Wilson was able to return home
from the hospital on Sunday.

WANTED—To trade a good
dwelling house for stock and farm
machinery. Apply The Advance
Office, Chinook.

E. W. Johnson, of Consort, was
a visitor at the home of J. Val-
lane north of Chiook last week.

L. S. Dawson and J. P. Watson
are in Calgary this week attending
the Alberta Wheat Pool Rally.

The Summer Chautauqua will
be held at Cerebral this year on
June 27-28-29-30 July 1-2.

Every farmer should have a
bottle of Spooner's Remedy for
Stock. A sure cure for all colics,
inflammation, etc. Every bottle
guaranteed. This remedy may be
purchased at the Chinook Drug
Store.

F. M. Sherman left on Monday
for Youngstown.

P. Rasmussen, manager of the
Youngstown Creamery, was a
Chinook visitor on Monday.

Miss Dorothy Roberts is spend-
ing a week's holiday with her par-
ents, Mr. and Mrs. A. E. Roberts.

August Rosenau purchased a
new Fordson tractor last week
from the local dealers, Messrs.
Cooley Brothers.

Mrs. G. A. Hoeknell, of Kin-
mundy, who has been visiting her
daughter at Tuberosa, Sask., for
the past seven weeks, returned on
Sunday.

Chinook to Celebrate Diamond Jubilee July 1st.

School Program, Sports, Fireworks
Display and Dance

A meeting of the Chinook citi-
zens was held in the Chinook Har-
ness Shop on Thursday evening to
organize for the Diamond Jubilee
celebration. It was decided that
the morning of July 1st be taken
up with a program put on by the
school children. The program in
the afternoon will consist of all
kinds of sports for both young and
old, and in the evening a splendid
fireworks display will conclude with
a grand dance. The following are
the officials in charge of the cele-
bration: President, L. S. Dawson;
Vice-president, S. H. Smith; Secre-
tary, E. E. Jacques. School pro-
gram committee: J. L. Carter and
W. Steckle. Sports committee: I.
W. Deman, W. Lee, O. B. Elliott.
Dance committee: W. Todd, John
Cooley, Chas. Neff, W. Milligan.

Everybody is expected to turn out
on this memorable occasion, and
invitations will be sent out to all
the schools in the Chinook district
asking them to bring the children
into Chinook on that day to take
part in the program.

Wheat seeding in the Chinook
district is finished, and many fields
are now looking beautiful and
green with the new wheat. Farm-
ers are busy seeding oats. For
the past week the weather has
been warm and sunny and con-
ditions very favorable for the crops.

Buy your Flags for the Dia-
mond Jubilee Celebration at E.
E. Jacques, Druggist.

J. Poeckens, of Camrose, ar-
rived in Chinook on Tuesday, and
is visiting his son John at Heath-
dale.

Carpenters are busy this week
in Chinook laying a new sidewalk
on the west side of Main street.

Mrs. R. C. Fraser, of Rollinson,
left on Wednesday morning for
Calgary.

A number of Chinook people
attended the Hanna sports yester-
day.

The Chinook Junior C. G. I. T.
held a garden party on Tuesday
afternoon at the home of Mrs. R.
Smith in honor of two of their
leaders Mrs. D. McKenzie and
Mrs. R. Srigley and some of the
junior members who are shortly
leaving the town.

Wm. Davis is a visitor in Cal-
gary this week.

Laughlin district will hold a
sports day on Wednesday, June
29, at Gingles' Grove, commencing
at one o'clock. Novelty races,
tug-of-war, horse races and tennis.
Baseball game in the evening.
Refreshment booth on the ground.
Free lunch at supper time served
to all present. Ladies please bring
lunch. Grand dance at Laughlin
school at night. Special music.

Mrs. J. W. Lawrence left on
Wednesday for Kingsley, Iowa,
where she will visit relatives.

Wheat Pool Meeting

A Sub-District Meeting of the Alberta Wheat Pool
will be held at

CHINOOK

ON

Tuesday, June 21st,

At 8 p.m.

This is one of a series of Sub-District Meetings to organ-
ize the campaign for the signing of the Second Series of
Wheat Pool Contracts.

All who are interested, whether farmers or townspeople,
are urged to be present. Members are requested to attend
the meeting in their own Sub-District if possible.

Law and Order, or Chaos?

The action of the British and Canadian Governments in breaking off diplomatic and trade relations with the Russian Soviet Government is the culmination of a long series of non-diplomatic actions on the part of the Soviet authorities, and openly expressed active enmity to British interests in all parts of the world. Professing friendship and enjoying rights and privileges wherever the Union Jack flies, Soviet emissaries everywhere plotted and schemed to undermine British influence, destroy British interests, all with the avowed object of ultimately overthrowing the British form of government and breaking up the British Empire.

Wherever in any part of the world unrest was found to exist, wherever trouble loomed up, there the Soviet agents were busy carrying on their baneful propaganda, and always especially active if British interests were in any way concerned. The British Government continued to exercise patience and forbearance until these ceased to be a virtue. If South, the Soviet regarded the policy of conciliation followed by Great Britain as a sign of weakness. They treated it with contempt while taking full advantage of it.

But it is not the British Empire alone that is involved in Soviet propaganda and activities. Every nation having a regard for the continuance of law, order and good government, and interested in the maintenance of sound economic principles in all international relationships and trade, must view with concern the attitude of the Russian Communist Government. In a word, all nations must recognize the fact that there are two major forces contending for supremacy in the world today so hopelessly antagonistic to each other that both cannot survive.

On the one hand, there is the communistic idea sponsored by the Soviet, a system which denies God, declares the moral code promulgated by all civilized communities, ignores rights of property, flourishes on strife, discord and unrest, has no regard for obligations solemnly entered into by it, and over seeks to promote its theories and activities through the medium of spies and openly lawless characters.

On the other hand there are those people who reverence God and religion, who uphold the moral code, who believe in the sanctity of marriage, recognize property rights, observance of law and respect for constituted authority and the honorable obligations of promises and treaties, who strive for peace and the orderly solution of social and economic problems, rather than resort to revolutionary methods, spy systems, treachery, threats, intimidation, even execution without trial.

One or the other of these ends for the government of mankind must prevail; there can be no compromise where principles of conduct are so absolutely opposed.

The nations of the world are coming to a realization of the situation and to an acceptance of the struggle involved. Unlike Great Britain and some other countries, the United States never recognized the Russian Soviet Government and has consistently refused to have any dealings with it. The whole English-speaking world now takes the same position. France, too, is alarmed, as is evidenced by the recent declarations made on behalf of the French Government. And U.S. Ambassador Herrick to France has declared his belief that "the people of every country have but to choose between order and anarchy, between honesty and thievery, between every day virtue and crime." "Either we believe in orderly society or we don't," he declared, "if we do, we ought to use all the power within us to defend and advance it."

Calling itself a Workers' Government, the Communists of Russia have sought to get control of organized labor throughout the world. In this they failed in Great Britain, in the United States, in Canada, where the hard common sense of the working men and the sanity and patriotism of their leaders have foiled these insidious attempts. "Tools" everywhere seek to create the impression that opposition to Bolshevism is opposition to organized labor, but nothing was further from the truth. Labor has everything to fear and lose from the spreading of the Russian doctrine and nothing to gain.

External vigilance is the price of liberty, and as there can be no true liberty under the Bolshevists, as even many of them have learned to their sorrow, the civilized nations must remain on guard lest they fall in the pit which has engulfed the people of Russia.

Says Comet Caused War

The cause of the war was due to comets trails left in the earth's atmosphere by Halley's comet in 1910, declared a speaker to a meeting in Washington. The gas made human nervous, suspicious and irritable, he said, and it was because of this in 1929, the Paris-Washington conference of last June must be blamed.

Rich Old Gentleman—"The life insurance companies won't take me." Sweet young Lady—"Then I will."

Muskatels in B.C.

The development of the muskrat industry five miles south of Revelstoke will be proceeded with further this year, 160 acres having already been fenced in by the Revelstoke-Muskatels Fur Breeders' Association.

Patience—"Dr. doctor, you are asking \$10 for taking a child out of my eye."

Children Cry for Fletcher's CASTORIA

MOTHER—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitation, always look for the signature of *Dr. J. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

History Will Repeat Itself

Hudson Bay Railway is Only Another Aid to Canada's Progress

Those who talk of the Hudson Bay Railway in similar strain today should be reminded that only comparatively a few years ago Edmonton was regarded as too far north to become the centre of developed territory. But Canada, once all length, grows broader year by year. Marquis wheat pushes the limit of cultivation two hundred miles or so nearer the Arctic circle and long before settlement has exhausted the hands thus made available, means will be found to utilize those beyond them. The Morning Star believes that once the Hudson Bay railway is completed and begins operation, less than a decade will elapse before those who now condemn the enterprise as hopelessly fantastic will be glad to report that they were proved as prophets. Vancouver Star.

Pain in the Back Yields to Nervine

If you have failed to secure relief from other remedies, rub on lots of good old "Nervine," the strongest, most penetrating pain reliever on the market. Nervine acts quickly on small pains and is the surest to drive out the big ones. It has been used for drop of Nervine rub in, because it has the ability to sing in deeply that it drives away pain that ordinary oils and lotions won't touch. Large size, 50¢. It drives away pain that ordinary oils and lotions won't touch.

R. A. F. Fighting Planes in Altitude Contest

Quickest Time Made in Ascent and Descent Will Decide Winner. Single-seater fighters, with motors supercharged to maintain power in thin air at great heights are to take part in an altitude race at the Royal Air Force display at the Hendon Aerodrome, N.W., on July 2.

Ascending with steady height increases, they will rush up to more than 25,000 feet or approximately five miles. Their pilots will wear electrically warmed suits and be provided with oxygen breathing appliances.

Having gained as rapidly as possible the height stipulated the pilots will come down and back to earth again, the winner being the airplane who makes the ascent and descent in the quickest time.

Attacked by Asthma. The first person to be attacked by asthma is which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Keston's Asthma Remedy without anything less than miraculous. His help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Future of China

Astonishing Development Awaits Establishment of Stable Government

"Readjustment of Affairs in China must be the (Chinese) and without foreign intervention," declared Robert Ford, world renowned shipping magnate, who, possibly, enjoys the confidence of the leaders of Chinese national life more than any other living white man. In an interview at Ottawa, he is a former Ottawa boy, whose romantic life gave birth to the famous character of "Gang Bitch." "A new astonishing development of commerce will take place in China," declared Mr. Ford. "It awaits only a stable and steady government which must come. When I wish I could answer that. But with a civil war raging throughout China, trade and commerce has flourished tremendously. When the war is over, imagine the effect upon Canada, the neighbor of China, when this development comes. Already Vancouver is feeling the benefit of Chinese trade."

Raised Thousands of Sheep

An old Norfolk shepherd died recently at Telford, England, at the age of 92. He was apprenticed as a shepherd at an early age and continued in that employment throughout the rest of his life. During his period of service he is estimated to have raised 200,000 sheep and only killed a few years before his death.

Oil for Pacific Naval Base

Representatives of the Anglo-Persian and other British oil companies have inspected oil exploration possibilities in Alberta recently with a view to securing a new oil supply area for the North Pacific naval base.

Burma is the world's chief producer of rubies.

Minard's Liniment for insect bites.

Jubilee Programme

A Message of Thanksgiving From Coast to Coast

In order that the Jubilee of Confederation shall be ushered in a uniform and fitting fashion, the national committee suggests that at high noon on July 1 bells be rung, whistles be blown, and wherever possible hands play "God Save the King" and "O Canada." Thus from coast to coast there will resound a message of thanksgiving for the past 60 years of progress, and of optimism for the future.

It is the intention of the national committee to issue invitations to a considerable number of distinguished persons to attend the opening ceremonies of the celebration in Ottawa, July 1. Among those who will be especially invited will be the surviving sons and daughters of the Fathers of Confederation, who are scattered throughout the Dominion and some of whom reside in Great Britain and elsewhere.

Invitations also will be sent to Sir Esme Howard, British ambassador at Washington; Hon. P. C. Larkin, Canadian High Commissioner in London; Hon. Phillippe Roy, Canadian High Commissioner at Paris; Hon. Vincent Massey, Canadian Minister at Washington; Hon. T. A. Sturges, Minister Plenipotentiary of the Irish Free State at Washington; Sir Hugh Dawson, Commissioner for Australia at New York; Hon. Eric Lough, Commissioner of the Union of South Africa, New York; Hon. W. J. S. Stevenson, official representative of the Dominion of Wales, New York; Hon. W. E. Munroe, President of Newfoundland, and William Phillips, United States Minister to Ottawa.

In addition special invitations will be sent to consular general residents in the Dominion of Canada.

Among others who will be specially invited to attend will be Hon. James H. Mcintosh, who was in an editor's chair at the time of Confederation, who is a former mayor of Ottawa, a former member of the House of Commons, and a former Lieutenant Governor of the North West Territories.

More Shoes for Women

Increased Output in Canada Far Ahead of Last Year

Women use more shoes than men in Canada. Nearly 100,000 more pairs of leather and felt footwear were manufactured for women in March than were produced in the previous month. The increase in production for men over the output in February was only 37,182 pairs. A report issued by the Dominion Bureau of Statistics shows that 632,955 pairs were manufactured for women in March and a total of 252,292 pairs for men. The total figures for the boot and shoe production record an increase in output of 276,629 pairs in March as against February.

Always Ready and Reliable

Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and when it is absorbed by the skin, its healing power is conveyed to the inflamed tissue, which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Motorists and Fires

If there were any way of arriving at an accurate survey of the causes of woodland fires it might very well be found that more of them are due to careless motorists than to careless fishermen and hunters. Hundreds, perhaps thousands, of burning cigar and cigarette ends are thrown from passing automobiles every day with no thought of their landing place. A single act of negligence like that may be responsible for a most disastrous fire.

PIMPLES BROKE OUT ON FACE

Lasted Nearly a Year.
Healed by Cuticura.

"My skin trouble began with pimples breaking out on my face. They gradually grew worse and spread to my body. They were red and itched very much and when I scratched them it caused more pain. Scratching caused eruptions which disfigured my face. At length I could not sleep on account of the irritation. The trouble lasted nearly a year."

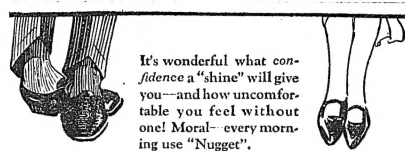

I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. The sample helped me so I purchased more and in five months I was healed."

(Signed) Willie A. Yarekco, 8224, 88th Ave., Edmonton, Alta.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.

Sample each free by mail. Address: Cuticura, Dept. 10, P.O. Box 10, Station 10, Lowell, Mass., U.S.A.

It's wonderful what confidence a "shine" will give you—and how uncomfortable you feel without one! Moral—every morning use "Nugget".

"NUGGET" SHOE POLISH

There's a "Nugget" for every shoe made.

Honored Poor Inventor

Egyptian King Visited England to Pay Homage to Samuel Crompton

Because 150 years ago a poor boy named Samuel Crompton wanted to help his mother, a king came to England all the way from the glamorous Orient, with all his glittering entourage, to stand in silent homage at his simple grave-stone.

What the boy did completely revolutionized the cotton spinning industry, made the British city of Bolton one of the busiest and richest towns in the world, and made possible a vast development in the cotton growing industry of Egypt.

That's why King Abdul came from Cairo, especially to take part in the centenary celebration of Crompton's death.

Last January, when the International Cotton Congress was held in Cairo, the King was asked to come to the Crompton celebration at Bolton.

As a boy, when Samuel Crompton helped his mother spin yarn at home for the industry was then carried on in the cottages, the difficulties he encountered suggested to him a cross between the Hargreaves and Arkwright contrivances.

The invention is generally known in the trade as a "mule," its principal innovation was the introduction of a spindle carriage which took away the strain on the thread and enabled much finer yarn to be spun, thus making mule spin possible.

Today Best Time to Buy Farms

Begin Now to Plan and Prepare for the Future

"Buy farms now" is in view of the present discontent of the farmers—the annual advice of the "Southern Agriculturist."

An editorial in the April 15th issue of this progressive farm magazine reads: "The young farmer or the older one, for that matter, who gets his feet firmly planted on his own land now and begins planning and preparing for the future is not at all likely to regret his action in the years to come."

Justification for this advice is found by the "Southern Agriculturist" both in its belief in the future of farming and in the fact that today farm lands are cheap.

"Just because farm lands have been small these last few years," points out the editorial, "is no reason the young man or young woman with a liking for country life should be afraid to risk his or her future on farming, no reason a parent should hesitate to train his children for work on the farm and for life in the country. And looking forward to that time one should obviously buy land now when prices are low."

The Oil for the Athlete.

In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent remedy. It renders the muscles and sinews pliable, takes the stiffness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

Would Widen Markets For Australian Goods

Canada-Australian Trade Treaty Very Much to Canada's Advantage

W. C. Cramb, who is visiting Canada at the request of Premier Bruce of Australia, in an address to the board of trade at Toronto said his object was to secure a larger market in Canada for Australian dried and canned fruits and for Australian products generally.

The speaker pointed out that the Canada-Australian trade treaty was working out very much in Canada's advantage, the balance of trade being unfavorable to Australia to the extent of \$7,000,000.

Contrary to popular belief, the whale does not spout water. The condensation of its warm breath in the colder air makes it seem like a geyser of water.

Lots of men pray for things they wouldn't be willing to work for.

Minard's Liniment is reliable.

Sheep Protection Act

Municipalities in Saskatchewan Now Liable for Damage Done by Dogs

Saskatchewan's new act for the protection of sheep from dogs, went into effect May 1st. Under its provisions, any municipality in the province is liable for damages done to sheep by dogs, and all municipalities must appoint dog wardens to enforce the law. Dogs which are destroyed or damaged by dogs, to provide funds to meet these losses, any municipality may impose a dog tax of \$1.00 for first and \$2.00 for the second and third dog kept, and up to \$5.00 for each female.

FOUND A HEALTH BUILDING TONIC

A Nova Scotia Lady Was in an Anemic Condition

Men and women who do not sleep well and are not refreshed and strengthened by a night's rest, are generally suffering from this watery blood. The nerves fail to get the nourishment they demand and headaches and a worn-out feeling is the result. Building up the blood is the one sure step to renewed health and strength, and for this purpose nothing else can equal Dr. Williams' Pink Pills. From first dose to last they purify and purify the blood, and in this way promote better appetite, better rest at night, and renewed strength.

Mrs. Mary E. Uhlman, Williams-town, N.S., writes:—"I have received so much benefit from Dr. Williams' Pink Pills, that I would feel myself ungrateful if I did not let you know. I was in a very poor state of health and reached the stage where I had to remain in bed. A doctor was called, but he told me I had no organic trouble, but was simply run down from overwork. I had been left with a family to support, which I did by dressmaking. The doctor said my blood had almost turned to water, and advised a rest cure. I did not see how it was possible to get on my feet very long, so I decided to try Dr. Williams' Pink Pills. Soon I found my strength returning and before long I was able to run about my duties as usual again. This was a few years ago, and my health remained good ever since. A year ago, when I broke out with hives on the blood, again I consulted the doctor, who said my blood had become so thin that it had really turned to water. I told him I had bought several boxes of Dr. Williams' Pink Pills, and he told me to go on taking them as he thought they were just what I needed. I took eight boxes and again was in good health, I can therefore truly say that I was able to get on in a week or run-down condition."

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail, post paid, on receipt of price, 50 cents a box. Try them today.

Learned the Reason. Forbes Magazine tells of a colored agent who was summoned before the insurance commissioner. "Don't you know," said the commissioner, "that you can't sell life insurance without a State license?" "Boss," said the man, "you snafu said a month ago. I knowed I couldn't sell it, but I didn't know the reason."

Remarkable Development Of Canada's Greatest Industry, The Growing Of Wheat

Canada's greatest individual industry, wheat growing, has developed almost entirely since Confederation. The present generation of Canadians are accustomed to speak of their country as the granary of the world, a phrase which would have been meaningless sixty years ago when Confederation was brought about.

Canadians must look with pride upon the achievement in wheat production of the last sixty years. What it means to the general business and to the transportation of the Dominion needs only be stated to be understood. Exports of wheat from Canada in the last two years, and there were only average crops, have brought in to this Dominion more than \$175,000,000 annually. This money, coming into the possession of the farmers, has been spent on the hundred and one articles which they need, thus stimulating the industrial centres remote from the grain fields and affecting, indirectly, every citizen of the Dominion.

The bulk of Canada's wheat crop is grown in the prairie provinces. Each harvest time the enormous task of transferring this crop from the fields to the consumers in distant countries is undertaken and accomplished. The farmer hauls his wheat to the country elevators, the original gatherer of the crop. There are about 2,500 country elevators in the wheat producing areas. The wheat is there loaded into box-cars and is started eastward and westward, as the case may be, to seaboard. If it is westward then the long haul road over the Rockies to Vancouver or Prince Rupert, whence it is shipped to Europe through the Panama canal, or to the Far East. In 1921-22, the last crop year for which final figures are available, 23,900,000 bushels went through Pacific Ports. In subsequent years the movement has been greater.

The greater part of the crop comes eastward in box-cars to Port William and Port Arthur, where large terminal grain elevators are located. In 1921-22, the figures are interesting because relatively they change very little from year to year, 159,000,000 bushels came east. All this wheat, whether eastbound or westbound, is inspected by Dominion government inspectors and is graded according to quality.

The grading of wheat in this quantity of itself is a monumental task, achieved first by this Dominion and followed by a few other wheat exporting countries. Without government grading the market of Canada's export crop at a fair price would be impossible.

The world's market for wheat is Liverpool, England. Here most buyers and sellers and the custom, as in ancient times, is for the seller to show a sample of his wheat so that the buyer may see what he is purchasing. Obviously, when production reaches such proportions as it has in Canada this no longer can be done. The Canadian government solved the difficulty by establishing a grading system. Canadian wheat is graded under well-defined regulations and any buyer in the world may buy the quality of wheat he desires by grade. The quality is guaranteed and in many years of experience foreign buyers have not yet complained.

Having reached Port William and Port Arthur, the next movement of the crop is at hand. From these ports it breaks into a score of channels all of them moving eastward towards the ocean. The grain flows come to the head of the lakes for their cargoes. The wheat is loaded into these steamers and some of them sail to the Georgian Bay ports, others to Port McNicoll, still others to Port Colborne, many to Buffalo, and a few go right through to Montreal.

A Perpetual Bank Account

Kipling when a citizen of Brattleboro, Vermont, where he established his bungalow, "Nauyassee" in which he wrote some of his famous works habitually paid by check. Puzzled to find that he always had too big a balance at the bank, he investigated, and discovered that merchants preferred, instead of cashing his checks, to frame them as souvenirs.—*Forbes Magazine.*

First Universal Language

Volapuk was the name given to what was intended by its author, Johann Schleyer, a teacher in Switzerland, to be a universal language. For some time after its invention in 1879, it flourished exceedingly, but then it languished, and its place is now taken by Esperanto, proposed by Dr. Zamenhof, of Warsaw, Poland, in 1887.

W. N. U. 1684

Danish Government May Aid Immigration

Country is Fertile Field for Recruiting New Canadians

Conducting a party of 85 Danish settlers, who reached Montreal on the White Star liner, Doris, to points in eastern Canada, Lorentz W. Sass, travelling inspector for steamship companies in Denmark, declared that Denmark was a fertile field for recruiting Canadian immigrants.

Considerable unemployment prevails there. The chief drawback to a larger influx is lack of money. In this connection, however, said Mr. Sass, the Danish government is considering ways and means of meeting this difficulty and is studying a plan practised by the Norwegian government whereby prospective emigrants are furnished with sufficient funds and given easy terms in the matter of repayment.

To Buy Canadian Cattle

Association Formed in South Wales For Direct Importation

The Canadian trade commissioner at Bristol, England, reports the formation of the South Wales and Monmouthshire Cattle Importers' Association, Limited, who during April filed a copy of their prospectus. The chief purpose of this co-operative movement is the direct importation of Canadian store and fat cattle, and to this end a central Canadian purchasing organization has been established. The new association represents nineteen meat traders' associations throughout South Wales and Monmouthshire and the capital is approximately \$20,000.

Winnipeg Newspaper Union

Fashion

Braid Trimming is Smart

This attractive dress has the much desired shirred lining and is a style suitable for all daytime wear. The front and back are quite plain and the plaited side-panels give added width and grace to the skirt. Braid is effectively used on the bodice to form a deep pointed yoke, and also trims the convertible collar, the cuffs finishing the long darts-fitted sleeves, and sides. No. 1522 is in sizes 36, 38, 40, 42 and 44 inches bust. Size 38 requires 4 1/2 yards 29-inch material, and 2 1/2 yards 54-inch, and 7 yards trimming braid. Price 20 cents the pattern.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity, brought through the means of the average woman. Price of the book 10 cents the copy.

British Colonial Empire

Colonies and Protectorates Have Population of Fifty Million

That the extent of the British Colonial Empire—that portion composed of colonies and protectorates, etc.—is roughly two million square miles with a population of 50,000,000, was the interesting statement in the report of the committee appointed by the present colonial conference to frame a scheme based on contributions to a common pool, for the creation of a scientific and research service. This service should be available to the whole Colonial Empire.

The committee, in view of the short time available, decided to restrict the inquiry to medicine, agriculture, veterinary science and forestry.

The conference of governors recently approved the scheme set out in the report and requested the Colonial office to appoint a committee to work out a detailed scheme for submission to all the Governments concerned. The conference was of the opinion that the scheme could be commenced on an income of about \$875,000 yearly, of which a considerable portion would be used in replacing existing expenditures on salaries of agricultural research officers.

Jersey Herds for Western Canada

B.C. Registered Stock Imported by Manitoba and Alberta Breeders

Recent Jersey shipments by B.C. breeders to the prairies have included 516 heifers from the well-known S. Matson herd, Victoria, to N. Norbury, McAuley, Man., who will use them as foundation stock for a new Jersey herd he is establishing. In this lot are some exceptionally well bred young dairies by a son of Zenta Sultan. One heifer is a daughter of the cow, Judo's Marigold Fern, whose record exceeds 1,000 lbs. butter, and there are others out of high-record cows. Another new prairie Jersey herd is that being established at Viking, Alta., by Child Bros.

Wild Horses are Worthless

Hundred Dollars Highest Bid Recently in B.C. for Eighteen Head

Hunters in the interior of British Columbia are expected to turn in 1,000 sets of ears from wild horses they will have killed on the range this year. For these they will get a bounty of \$1.50 per set from the provincial department of lands and forests. The horses are practically worthless, \$100 being the highest bid received for a carcass of 18 head rounded up recently at Springhouse, one of which was a four-year-old stallion weighing only 400 pounds.

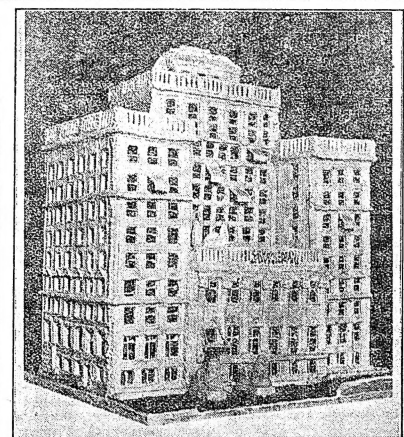

Consumption of Eggs in Canada

Canadians are now the greatest individual consumers of eggs in the world, according to the Minister of Agriculture, speaking here. The per capita consumption of eggs in Canada has risen from 16 dozen to 28 dozen since grading was introduced. Canada consumes 99 per cent. of its own egg production.

To Improve Highways

Two million dollars will be spent in the Central Manitoba municipal area on development work this year. Improved navigation and highways into this district are included in the activities of the Mining Bureau of the Winnipeg Board of Trade.

Marriage to a woman means a lifetime job as a detective.

There are various mediums of art, this photograph being an example of the clear use of sugar by the veteran pastry chef of Chateau Lake Louise, John Meyer. It is a true copy of the new Hotel Saskatchewan, Regina, 25th 35 inches, weighing 80 pounds, of glistening white sugar. Mr. Meyer did all the work on the candy structure himself, the masterpiece occupying his time for ten days. The candy copy of the new hotel was taken to Regina for the opening on May 24th.

Canada Prefers British Settlers

But Only Limited Number of Right Class are Available

"The importance of applying policies providing Canada with man-power, without introducing unemployment but rather increasing the demand for labor, must be emphasized, with the necessity of preventing the admission of undesirable emigrants," Hon. Robert Forke, Canadian Minister of Immigration, declared in London while discussing Canada's immigration problems with newspapermen. "Canada's immigration activities are therefore both positive and negative," he added.

Shortly after his arrival with W. J. Egan, Deputy Minister of Mr. Forke's department, the Minister received about 20 journalists at his hotel and, after reading a written statement he had prepared, answered their questions.

"Canada has adopted the policy," he said, "of encouraging farm laborers and household workers. In recognition of the strong British strain in the national fabric, special emphasis is laid upon immigration from the British Isles. Co-organizing steps have been taken to relieve the British settlers of the handicap of high ocean fares. The fact that only a limited number from the classes mentioned are available from the British Isles necessarily broadens the field to include the United States and European countries from which suitable settlers may be secured."

Nebraska Farmers Coming

Advance Agents Seeking Suitable Tracts of Land in Alberta

Representing fifty Nebraska families who wish to settle on Canadian farms, Frank Stewart, of North Platte, Neb., headed a delegation of farmers who have been conferred with C. A. Van Sore, superintendent of colonization for the Canadian Pacific Railway. The land seekers will go to Calgary with a representative of the colonization department to inspect suitable tracts in Alberta. The group proposing to emigrate has ample capital, it is said.

Special Crate for Shipping Fish Eggs

A special crate for shipping fish eggs has been developed by the Canadian Department of Marine and Fisheries. In this type of case salmon eggs have been shipped from the Maritime Provinces to British Columbia; from St. John, New Brunswick, to Dublin, Ireland; and from Vancouver, British Columbia, to Tokyo, Japan. The eggs in these shipments hatched out practically as well as those hatched at points at which they were produced.

Out of Everything

If you haven't an automobile you are out of everything, including debt. A friend presents you with a wallet. You can't get it home conveniently. If you wish to go anywhere not on a railroad or street car line, you must call a taxi, or depend upon a friend who owns a car, and you and your car-owning friends are redoubtably interested in going to the same place. If you walk you may be lost over.

Training Indian Children

The training of Indian children in Canada is one of the important activities of the Department of Indian Affairs. There are nearly 15,000 Indian boys and girls enrolled in the 311 Indian schools under the direction of the Department.

Canada Is Reaching Out With An Ambitious Program Concerning Aerial Navigation

Proves Water Has Skin

Easy Experiment Anyone Can Test For Himself

There is a skin we touch every day of the year, a skin we see often of us realize its existence. If we break it or hurt it it heals itself without our help and possesses the power of self-renewal quite as much as anything in nature. It is the skin of water.

But where is there any skin on water? Right on the outside—right where you would expect to find a skin on anything. Every surface of water behaves almost precisely as if it were an elastic membrane under tension. Drop a few drops of water from a spoon, bottle, or the end of your finger, and see them trickle down, first pear-shaped and then rounded into little globes, bobbing exactly as if they were confined by rubberkins.

But why globes? Because a globe is just the shape an elastic skin must take if acted on by pressure within, or if trying to close in on a fluid within it. Even the sausage-shaped balloons of the street vendors tend to take the spherical shape when inflated. A sphere happens to be the one shape of all possible shapes which can contain the greatest amount of space within the least amount of surface.

And here's a particularly easy experiment which can be made right now, at home or at the office, which shows what this skin is like and how it behaves. All you will need is a short bit of cotton string and a bowl or glass nearly filled with clean water. Be sure that the bowl or glass is not greasy, for we don't want any grease just yet. Now lay the cotton string just across the surface from side to side so that it divides the surface. The way it is now the skin of water pulls the string both ways, so it does not move. It remains still.

Now, to show the pull, or as the physicists call it, the tension of this water skin, drop a few drops of oil on the water to one side of the string. Immediately the string will move away from the oily side, pulled by the elastic skin, for the oil immediately forms an oil skin on one side of the string and the oil skin has less tension than the water skin on the other side. The string moves with the more elastic skin.

International Stock Show

A Carload of Bacon Hogs From Manitoba Will be Exhibited

A carload of bacon hogs will be included in Manitoba's exhibit at the International stock show in Chicago this coming fall. J. E. Hildebrand, manager of the Provincial Fair, has just turned from a member of the Manitoba Livestock Board, where provincial plans were laid. The bacon hog exhibit on such a scale will be the first step by Manitoba to gain recognition for that particular type of animal raised in the province. Three carloads of hogs and two of cattle will be sent by the province to Toronto and elsewhere, a portion going on to Chicago. The sheep men will have a worthy exhibit for Toronto, Guelph, Ottawa and other centres.

Alberta Sugar Beets

Farmers throughout Southern Alberta are supporting the sugar factory admirably. To date 7,000 acres of beets have been contracted for with an anticipated harvest of 500 acres, which will bring the total to 7,500 acres of sugar beets for the 1927 season. A notable feature this year is the thorough preparation of the soil before planting.

Using Reindeer in French Alps

One dozen reindeer are to be moved from Norway to the French Alps this winter to assist in hauling them and utilizing them for hauling sleighs on the mountain roads in the winter months. The reindeer, it is claimed, will render accessible many picturesque spots in the mountains which cannot be reached by horse-drawn or motor-driven vehicles.

Had—You're behind with your studies, son.
Son—Well, how could I pursue them if I weren't?

Animals that occasionally are fed candy, are much more easily lured than those which never have tasted sweets, says a big game hunter and zoologist.

It is usually tomorrow that all great things are expected to happen.

In this year of Jubilee Canada is reaching out with an ambitious program of aerial navigation with the most imaginative of the Fathers of Confederation never entertained even in their wildest dreams.

Flying in Canada was born of war, and in these later days of peace the conquest of the air goes on apace. During the war flying was a young man's game, and the youth of Canada won renown with machine-guns hissing from the cockpits, propellers roaring, and bombs swaying from the undercarriages. It was grim business but it proved the sporting blood of a young nation.

Peace came and these young men who rode the whirlwind returned to Canada to earn their living as civilians. But the spirit of war air-war survived, and in a small but seasoned organization called the Royal Canadian Air Force the traditions of aerial navigation were carried on. The young airmen, trained in war days looked to the civil departments of government for employment. They were needed and within two or three years of the close of the war many of them were in the Royal Canadian Air Force, detecting forest fires, locating smugglers on the boundaries, and mapping out by photography the vast areas of the hinterlands.

Civil flying soon passed its way to the front during the post-war years, and the government of Canada was quick to establish the necessary code of laws for aerial navigation. The administration of these regulations was given to a branch of the Royal Canadian Air Force, and today the Dominion is safeguarded by a set of strict regulations governing the licensing of all mechanics, pilots, air harbours, international flying signals, and the inspection of air craft.

The most conspicuous work done during these recent crowded years of flying history in Canada has been the survey work in which the Dominion has led the world. Other countries have not on spectacular flights of astounding endurance, but Canada's contribution has been along sound commercial lines. In 1925, 56,000 square miles of Canadian territory were photographed and mapped with an accuracy which would have required years and millions of dollars if done by ground work.

The year 1927 has brought a practical acknowledgment by parliament of this valuable work. Since the war Canada has never spent more than \$1,500,000 a year for air development. This year more than \$3,000,000 was voted by parliament for the Royal Canadian Air Force to be divided between military and civil flying. Cities are being encouraged to set aside land for future air harbours, technical advisers from Great Britain are visiting the Dominion to make recommendations for the future linking of the Empire by airways, and the Post Office Department is taking the initial steps towards what will be an Atlantic to Pacific air mail route.

Canada's future in the air is assured. So certain is the Canadian Government of the development to come that at the Imperial Conference of 1926, Canada pledged herself to the creation of a great mooring mast which will be one of the air ports for the vast dirigibles being built in England to cruise the world through the Empire's skyways.

Strawberry Crop

Yield Expected to be Larger Than Last Year

Reports from strawberry producing districts of Canada to the Department of Agriculture show that the commercial plantations in all the provinces have wintered well and, providing weather conditions remain favorable, the yield, based on normal production, should be slightly larger than last year. The Dominion's average last year was 4,000, producing a crop of 11,112,500. This year the estimated figure is 13,201,500 quarts or an increase of 20.5 per cent.

Beaten for Aviators

For the benefit of aviators on the Mediterranean air route a million-dollar power beacon is to be installed at the summit of Mount Etna in Sicily. The power is to be generated by the winds which are continually blowing at the top of the mountain.

In Great Britain the feet are used as an aid to identification and it has been shown that the inhabitants of London have long slim feet, those of Wales low in the arch, and those of Scotland, broad in the sole.

You can't believe everything a woman says, for who compliments another upon her beauty.

WORLD HAPPENINGS
BRIEFLY TOLD

For the first time seven judges took their seats on the bench of the Supreme Court of Canada. The Supreme Court was enlarged last session to its present complement.

Congratulations upon the recent opening of the Commonwealth parliament at Canberra have been transmitted by President Coolidge in a message to the governor-general of Australia.

Liquor seized by the coastguard from run runners outside the 12-mile limit can be introduced as evidence in the trials of the run runners, the U.S. Supreme Court decided.

Nutrition and conductors of the Winnipeg Electric Railway have settled the question of wages by accepting the company's offer of one cent an hour increase each year with a three-year contract.

By the present tentative plans the Prince of Wales and Premier Baldwin will sail from England July 23, arriving in Quebec July 23. The Prince and the Premier will spend August 2, 3 and 4 in Ottawa as guests of Their Excellencies, the Governor-General and Lady Willington and of the Government of Canada.

One of the finest collections of Indian material in Canada consisting of bone, horn, stone and shell objects which was recently purchased by McGill University has just arrived at the David Ross McCord National Museum. This collection was dug from the ground many years ago in the district surrounding Brantford, Ont.

"First class" is the word that Hon. George Hoadley, minister of agriculture, applies to Alberta crop prospects. He says that in 26 years' experience in the province he has never known the land in general to be in such good condition, and the reports that are coming in give every reason to expect a big season.

Sir Frederick Stuart, director of the Dominion meteorological bureau in commenting on the predictions of Herbert Brown, of Washington, D.C., to the effect that 1927 will be a summerless year, said he does not regard such a prospect as probable, and that even if the year should prove to be summerless it would be impossible to foretell the fact this far in advance.

Observing Diamond Jubilee

Large Attendance Expected at Service in Westminster Abbey

Preparations are now well advanced for the great service in Westminster Abbey, July 1, which will form the chief commemoration in London of Canada's Diamond Jubilee. The Dean of Westminster, Very Rev. Dr. Foxley Norris, has drawn up an order of service which follows as nearly as possible that which was used when the jubilee of Confederation was commemorated in the Abbey in 1917.

Owing to the King and Queen having a number of engagements to fill in Scotland so close to the date, it is feared it will be impossible for Their Majesties to attend the service. The Duke of Connaught already has indicated his intention to be present. Practically the whole of the British cabinet and a large number of representatives of embassies and legations have asked that seats be reserved for them.

Not to Be Trusted

Breat Britain has tried in many ways to honor the fiction that Moscow's diplomatic intentions are honest and that its word can be depended upon. She has always found to her cost that confidence of this overgrown nation was sadly misplaced. The Soviets are incurable. They do not let the right hand know what the left hand is doing. They make promises to one's face and break them behind his back.

No man can tell what his wife is going to do by what he tells her to do.

The man who pays as he goes seldom gets beyond his speed limit.

W. N. C. 1684

Molding the Child's Life

A Warning to Mothers to Watch Childhood Dreams

An exhortation to mothers to study and mold the all important dream life of their children, which when uncontrolled may lead to disaster, is contained in an article by Florence Hull Winterburn in the June issue of "Psychology Magazine."

Mrs. Winterburn in emphasizing the importance of the child's dream life writes: "It is from childhood dreams that the stuff of good or evil lives is obtained. The little child knows as much less than he believes; he believes so much more than he imagines. Imagination is the king of his life, the priest of his faith. What he wants—this he dreams about. What he has in dreams, this he aspires toward in his daily life. Dreams influence reality and reality gives out the material from which dreams are built."

"If it is hard," points out Mrs. Winterburn, "for even the most logical and truthful person to accurately distinguish between the ideas obtained out of practical living and those intangible fancies coming in dreams, how much more impossible is it for a child, who is most of his time, waking and sleeping, under the domination of his imagination, to be sure of what is true and what is false? Before we bring any child to account for these little tales or fancies he seriously relates to us as facts, we should investigate the sources of his belief."

Mrs. Winterburn stresses the fact that among children dreams are often "trants." "The miseries of a child who is forced to repeat in dreams," she writes, "in an exaggerated shape, the disagreeable experiences of a hard day, are things seldom taken account of by the grown people who have almost forgotten their childhood. The old-time practice among our Puritan ancestors of having a child rehearse his bad deeds before going to sleep, and then getting the punishment for them at the bedtime hour, was a deplorable misuse of authority. We should on the contrary, guard our child from trouble at night."

"In almost everybody there is a tendency toward some special type of dream," observes the article in "Psychology," "originating in a suppressed desire of some sort. It is not only our privilege but our duty to study our child and find out precisely the stuff he is made of through investigation of his dream life. Dream life is more than half the existence of children, and the wise parent may exercise deep and intelligent influence over their brains by suggestions toward right."

Will Always Bring Results

Success Assured If Anything Worth While Is Advertised

Some time ago the people of Colorado Springs got the idea that there were great attractions in that place for tourists. Following up this bright idea they made spasmodic efforts for several seasons to attract visitors, but without much success. So they decided to appropriate \$14,000 for advertising. This helped, and the next year they increased the sum to \$60,000. They advertised chiefly in newspapers, all over the country. Over \$8,000 of this was spent in Colorado Springs last year, carrying some 350,000 people. More than 50,000 more people came by train. These visitors spent about \$12,000,000 in the Colorado Springs neighborhood. Not a bad return for a \$60,000 investment! Where there is no publicity the enterprise perishes. If there is some publicity, really worth while advertising of the right sort will make a great success of it.

Supporting Mother Country

Says Canada's Attitude Is Most Satisfactory Aspect of Imbroglio With Russia

Discussing Britain's break with the Soviet in his paper, the Observer, J. L. Garvin says: "Canada has set a magnificent example in supporting immediately the action taken by the Mother Country, Canada, locally, had no grievance comparable to ours, but on the one hand Mackenzie King sees the common Imperial interest now at stake and on the other he brings Canada as well as Britain into line with the unchanged position of America. The decision of Ottawa is by far the most satisfactory aspect of the whole imbroglio."

Vancouver Island Mines The Ladyship Smelter is to be taken over and equipped with modern machinery to treat ores of the mines of Vancouver Island. It is expected this will mean a marked revival of operations of many old, low-grade ore properties.

You may be able to save a lot of money by not being able to buy the things you think you want.

Was Once Object of Dread

People in Olden Times Were Superstitious Over Eclipse of Sun

The fact that England is to experience, on June 20th, the first total eclipse of the sun since 1724, recalls many accounts in ancient and medieval writings of the superstitious dread which eclipses caused before their nature was fully understood.

In a thousand years there have been only 12 total eclipses of the sun in England. They occurred in 875, 885, 1023, 1133, 1140, 1155, 1320, 1421, 1455, 1558, 1652, 1715 and 1724. Between these dates legends of dreadful occurrences connected with the eclipses had plenty of time to grow up.

Astronomers of today are worried by the difficulties in the way of accurate prediction of the central line and the time of the eclipse. Four thousand years ago it would have worried them even more. Two Chinese astronomers Ho and Hui, who failed to give notice of the eclipse of October 23, 2137 B.C., and added to their offence by being drunk at the time, lost their heads. Since their time it has always been accounted unlucky by astronomers to be drunk during an eclipse.

In the Solomon Islands eclipses of the sun are credited to the machinations of sorcerers, while in some parts of New Guinea they are regarded as portents of a good season or success in battle. In the Philippine Islands last year caused a great excitement among the mountain tribes, who looked on their armour and sword and hundreds of gongs in the belief that crocodiles were rising from the ocean and eating the sun.

Shipping Salmon Eggs

The Largest Consignment Ever Made in Canada

The largest single consignment of salmon eggs ever shipped in Canada was that made by officers of the Fish Culture Service of the Department of Marine and Fisheries to the waters of the Fraser River in British Columbia. Fifteen million sockeye eggs in the "eyed" stage, were transferred in specially constructed crates from the Dominion Government's fish hatchery at Pemberton on the Fraser River below Hell's Gate Canyon to the following spawning grounds in the upper Fraser: Stuart Lake, Francois Lake and the Quesnel Lakes.

This chic little frock is smart in every detail and would be equally attractive if fashioned of silk. Fine woolen material, or washable goods. The skirt has plaits in the front and is joined to a bodice having the modish deep V front ending in a scalloped, and there is a belt across the one-piece back. Contrasting material is effectively used for the shaped collar, front, and cuffs. The long tight-fitting or short sleeves. No. 1531 is in sizes 8, 10, 12 and 14 years. Size 10 years requires 2 1/2 yards 36-inch material, or 1 1/2 yards 44-inch, and 3/4 and 36-inch contrasting. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Address—Winnipeg Newspaper Union, 1533 McDermott Ave., Winnipeg

Pattern No. Size

Name

Town

Has Had Wide Experience

Fortunate indeed is the person, entering the dining room of a large hotel, who is acquainted with the head waiter. Umberto Tragolla, who will be the superintendent of service at the new C.P.R. Hotel, Saskatoon, at Regina, has served in the dining rooms of some of the largest hotels on the continent, including the Empress at Victoria, Hotel Vancouver, Place Viger, Montreal, Knickerbocker, Sherry and Neistors, New York, and the Guneward Hotel, New Orleans.

New Variety of Poultry

Said to be Much More Profitable Than Barnyard Fowl

"Turken" is the name of a new variety of poultry which made its first public appearance at the Edmonton poultry show. It is not the result of a cross between the hen and turkey, as many have mistakenly supposed from the name (an impossible cross), but as a matter of fact the Turken is a cross between a domestic hen and a bird of the pheasant species bred in Russia, and whose flesh is supposed to have the turkey flavor. This Russian bird has a bare neck like a turkey, and the propensity of the cross has the same characteristic; and this may account for the suggestion that a turkey and a hen have been successfully mated. By careful breeding on scientific lines, the strain has now been fixed and the birds breed true to the new type.

The male Turken has a comb and wattle like a cock, but talks like a turkey and walks like a pheasant.

This will probably be news, even to most poultrymen, but it is also a matter of interest to the general public, and one to which our Minister of Agriculture might well direct the attention of all poultrymen. If the claims made for turkens, that while the flesh is similar to that of a turkey, it has more flavor and is more tender, also the legs and breast are much larger than those of an ordinary chicken, that up to twenty weeks old they are the quickest growing chicks of any known breed of table fowl, and that the pullets usually begin to lay in five months, can be substantiated, the sooner poultrymen "catch on" the better.

If, in addition, as is claimed, the chicks are extremely hardy, easily reared, mature early, and are good layers, don't require any different care or food or more of it than barnyard fowls, and are much more profitable to all the farmers and their wives will be glad to know where and how they can get a start in this new line of poultry.

Official Live Stock Annual

Study of the past is especially valuable as a key to the future. There lies the particular interest, as well as in the record, of such a publication as the seventh annual live stock market and meat trade review, covering the year 1926, issued by the "Live Stock Branch of the Dominion Department of Agriculture. It is indeed a vast mine of statistical information relating to the dealings in live stock of the entire country. Quantities and prices of all classes are given month by month and for the last five years by year. The story of both our domestic and export trade is told and reviewed in the fullest detail.

British Capital Interested

Campbell Hunter, O.B.E., well known geologist and oil expert, accompanied by C. L. Fisher, representing British capital, is investigating the Wainwright and Ribstone oil fields. The Turner Valley will also be visited.

Nothing succeeds like the efforts of a man to be dis-succeedable.

SUNDAY SCHOOL LESSON

JUNE 12

PETER DELIVERED FROM PRISON

Golden Text: "Many are the afflictions of the righteous: But Jehovah delivereth him out of them all."—Psalm 34:19.

Lesson: Acts 12:1-17.
Devotional Reading: Psalm 34:1-5.

Explanations and Comments

1. Peter Imprisoned, verses 1-4.—Peter, James and John were the three prominent men among the apostles, and Herod Agrippa I. began his persecution of the followers of Christ by having James beheaded. Finding that this act greatly pleased the Jews, he selected Peter as his next victim and had him imprisoned to await his execution after the close of the Passover. Executions were not carried out during the Passover, and Herod was anxiously a Jew and most careful in all Jewish observances. Peter was guarded in prison by four quarters of soldiers, four sets of men, one set for each watch, two of whom were chained to Peter in his cell, and two were on guard outside, verses 5-6.

"When a man finds that a certain course of conduct is receiving popular applause he is led on to further excesses. A public speaker descends to a coarse and vulgar jest, and because it pleases the baser sort in the audience and the speaker is awarded a round of applause, he is prone to descend to still further depths of degradation."—Dr. J. H. Davenport.

11. Peter's Deliverance, verses 5-11.—Peter was in prison, but prayer was made earnestly of the church unto God for him.

"I wish I could burn these two words, unto God, into every heart, so that whenever we pray, in public or in private, the words would stand right before us; and that before we prayed a syllable of prayer we would be sure every effort that we had really come into the presence of God and were actually talking to him."—R. A. Torrey.

At night, shortly before he would have been brought forth for trial and death, help came. "There is the knocking, there are the friends praying; and the man himself around whom all the menace and the intercession are gathering has shut his eyes and quietly himself to slumber, because there, too, is he who neither slumbers nor sleeps. God is there in the palace of prayer, keeping all the threads of the drama in his own hands; holding the tyrant's power in derision; hearing the prayer that ascends to his holy habitation, responding to the first of his child, the angel of deliverance."—Dr. J. H. Davenport.

The moment of deliverance is apparent, and already his messenger and instrument is on the way to loose him that is appointed unto death. How will may Peter sleep when God is watching over his bed and preparing his awakening!—Robert Law.

The circumstances of Peter's escape are told very minutely—the coming of the angel (the word angel means messenger), the light in the prison, the breaking of the bonds, the words to make haste, the falling of the chains, the gliding and putting on of sandals and outer cloak, the command to follow, the passing of the first and the second guard, the opening of the outer gates of the prison leaving him into the street, the going out and passing through one street, and then the being left alone.

Peter was alone and thought his experience unreal until he "came to himself" and said, "The Lord hath sent His angel and delivered me out of the hand of Herod. One thing is certain, whoever delivers us from a great peril will always seem to us an angel. There are no bolts and there are no bars which can withstand the purposes of God."

New Use For Helium

May be Substituted for Nitrogen in Air of Diving Belts

When helium was first discovered it was considered a sort of scientific toy, and was obtainable only in extremely small quantities. Then it was produced in quantity sufficient to take the place of hydrogen in airships. Experiments are now in progress to substitute it for nitrogen in the air of diving belts. For the nitrogen under high pressure enters the tissues of the bodies of the divers, and when it escapes during the ascent causes severe incalculations. The discovery has an economic value for helium it will be possible for divers to descend to the bottom of the Bay of Vigo and secure millions of gold from sunken Spanish galleons.

Sacrifice Reindeer

Word comes from northern Siberia that the natives of Arctic villages, thinking that the angry gods have decided there shall be no summer, are killing thousands of reindeer as sacrifices. It is unusually cold there, the warmest lately being 35 degrees below zero.

Flin Flon Mine

The \$750,000 concentration plant at the Flin Flon mine in Northern Manitoba has begun operations and 200,000 tons of zinc have already been blocked out, according to the Winnipeg Board of Trade, which is actively supporting the construction of a railway into this area.

Do you know of anything that is harder to get than easy money?

Would you buy canned goods that bore no label? Would you buy an automobile of unknown make, no matter how cheap? Nobody would be so foolish.

You get to trust a name or a label just as you get to trust a man, through satisfactory and honest dealings. That is why kitchen and household utensils bearing the SMP label are bought without question by millions of Canadians. The shield-shaped logo and red SMP trademark is a guarantee of full value and best quality. The firm behind SMP goods is

Saskatchewan Egg Pool

Farmers' Wives Constitute the Board of Directors

The women of Saskatchewan are winning their spurs in the egg and poultry field. At the first annual meeting of the Saskatchewan Egg and Poultry Pool, the directors of which, all but one, are wives of farmers, the report of the year's business showed a turnover of \$857,137. The Pool began business at the end of March, 1926. During the year it handled 1,193,847 dozen eggs and \$100,000 lbs. of poultry. At the close of the year the pool had paid-up share capital amounting to \$12,374 and a reserve of \$7,700. The membership is approximately 16,000.

Soldier Settler Lands

Movement Started for Re-Evaluation of Holdings in Saskatchewan

Machinery for the revaluation of soldier settler lands throughout the west, long awaited, was set in motion for Saskatchewan, when the start was made in the Regina office of the board to send 2,500 letters to soldier settlers. With the letters went for of application for the revaluation of these places will be filled in by the settlers and returned to the board by October 1st.

U.S. Immigration to Canada

Analysis of United States Immigration to Canada for the last fiscal year discloses that Michigan was the heaviest contributor among the States of the Union with 2,861 new citizens. New York and Washington tied for second place with a total of 1,857 each. Following came Minnesota with 1,475; North Dakota, 1,279; California, 1,262 and Massachusetts, 965.

Big Oil Refinery

Work will begin at once on the construction of the first unit at Wainwright, Alberta, of a ten-thousand-barrel-a-day oil refinery, according to Dr. A. Prior, president of the Wainwright Development and Mining Co. Shipments of lubricating and tractor oil will begin before September.

Was So Nervous The Least Noise Made Her Jump

Mrs. W. H. Yates, Ashern, Man., writes: "I was bothered very much with my heart and nerves, and the least noise would make me jump and almost stop my heart beating. I told my mother about it one day, and she said that she had been bothered the same way and told me to get a box of

When I had taken the one box I felt quite a lot better and by the time I had taken three boxes I got relief. Price 50c. a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

SAYS CONDITIONS IN WEST WERE NEVER BETTER

Calgary.—At the 56th annual general meeting of the Canadian Manufacturers' Association, an optimistic note was struck by the chairman of the prairie division, T. N. Clayton, Winnipeg, in his review of conditions in the prairie provinces.

"General conditions in Western Canada were never more full of promise," he declared. "We are looking forward confidently and with justification to rapid development in the immediate future. Our primary industry, agriculture, has made tremendous strides in past three years and established itself on a firmer basis than ever before. All though weather conditions have been adverse this year and the acreage even will very likely show a decrease from last year, yet there is no reason why we cannot expect a bountiful harvest."

"Probably no work of the association in the prairie provinces," said Mr. Clayton, "shows more encouraging results than the 'Produce-in-Canada' campaign. During the past year it has been adopted by the public generally. One no longer hears the statement that one might better buy imported goods and pay the Government duty, than buy Canadian products. This is attributable largely to the 'Produce-in-Canada' campaign of the association and to the several buy-at-home campaigns arising therefrom. These have aroused the public to the benefits that accrue through buying goods made at home, in the way of increased employment and payrolls in their own localities."

In conclusion, Mr. Clayton said: "Most gratifying of all the years developments on the prairies has been the change in the public attitude toward manufacturing. Fuller appreciation of the value of the payroll and the factory to the community has seized the public mind and we find at all points a keen desire for new industries and a willingness to extend aid in having them established. All these provinces abound in natural resources and opportunities which constitute prospects worthy of serious investigation. I would recommend that all Canadian manufacturers give due consideration to these possibilities for the profitable extension of their operations."

Appeals For United Canada

Should Keep Soviet Agents Out Says Sir Henry Thornton

St. Thomas, Ont.—Sir Henry Thornton, president and chairman of the Canadian National Railways, in the course of an address before the business men of this city, suggested that agents of Soviet Russia should steer clear of this country and permit Canadians to build a united, contented and prosperous Dominion.

"This nation is founded upon the fine traditions of the Anglo-Saxon race; its jurisprudence embraces the fine principles of the English law and fair play," Sir Henry said. "We are essentially a law-abiding people, and we want no element to come in and disturb that condition."

"Whatever element may think about other forms of government and about visionary schemes of society, it may conservatively be described as distinct and unique and if any communist list wants to come here and enslave the slaves, we should inform them that we can do the waking of these slaves ourselves."

Using St. Lawrence Route

Quebec.—A record number of immigrants entering Canada through the port of Quebec compared with corresponding periods of recent years is reported here by the harbor authorities. In the course of the first five weeks of navigation more than 20,000 immigrants have disembarked. Immigration officials believe that over 200,000 will come in this year by the St. Lawrence route, as compared with 100,000 last year and 85,000 in 1925.

World Advertise Canadian Foods Ottawa.—The Canadian Horticultural Council has placed before the federal department of trade and commerce a proposal respecting participation in the scheme for advertising of Canadian food products in Great Britain.

Plan Big Elevator Vancouver, B.C.—The Province says: "Construction of a 1,500,000 bushel grain elevator to cost approximately \$2,000,000 will be commenced here shortly by the Alberta Wheat pool, according to announcement from Calgary."

W. N. U. 1484

For a Better Understanding

Appreciation of Needs of All Portions of Canada Required Says Beatty Vancouver.—In this year which we celebrate the Diamond Jubilee of the Confederation of Canada, our greatest contribution to the memory of those courageous Fathers of Confederation should be a greater understanding of the needs of those portions of the country in which we ourselves do not live," said E. W. Beatty, president and chairman of the Canadian Pacific Railway in an address given at a combined luncheon of the Canadian Club and the Vancouver Board of Trade.

"National characteristics are backed up by greater resources heretofore undeveloped," said Mr. Beatty. "The first is the tremendous area of agricultural lands producing the finest wheat in the world, and not less important vast areas of equally good arable land as yet untouched by the plow."

"It is estimated, in fact," continued Mr. Beatty, "that only one out of twelve to one eighth of the country's agricultural lands have as yet been cultivated. The second is its also unlimited water power. I doubt if there is any other country in the world so plentifully supplied with power development as Canada, and everyone realizes what that means as a factor in industrial expansion."

"The third is its forest wealth, which already has enabled it to conduct lumbering operations, the annual output of which exceeds \$155,000,000 and to produce pulp and paper to the value of \$200,000,000."

"Then there are its mineral possibilities, the possibilities of which are very great enabling it to produce gold, silver, nickel, zinc, lead and copper to an aggregate value in 1925 of \$112,000,000."

Reach Amicable Settlement

Britain Waives Claims for Detention of Shipping During War

Washington.—Chiefs of the British Government and its nationals against the United States for seizure and detention of shipping during the world war have been waived by Great Britain. It was disclosed with publication of notes ratifying an agreement reached two weeks ago.

In return the United States Government agrees to cancel the money thus saved to pay claims of Americans against the British which might fall of settlement in the British courts but which the United States Government regards as meritorious.

British claims which the United States Government has recognized as just are understood to total approximately \$100,000,000, with others for which liability has not been conceded reaching a higher figure.

Many Settlers Reached Winnipeg Winnipeg.—A youthful party of 15 Scotch boys from the hills and glens of Scotland and from the industrial centre of Glasgow, have arrived in Winnipeg seeking jobs and farm locations on the prairies. With this party were four British and two Danish families who will settle on the prairies as soon as they can find a satisfactory place. Other arrivals were Poles, Russians, Hungarians, Czech-Slovakians, Rumanians and Slovaks.

Cut-Off Date for Pool Wheat

Regina, Sask.—The directors of the Saskatchewan Wheat Pool have set July 15 as the cut-off date for the 1926-27 crop. It was officially announced. All street grain delivered and settled for by cash check on or before July 15 will be included in the 1926-27 pool. For cash grain all grain not loaded out by July 15 will be carried over into the 1927-28 pool.

Ramsay MacDonald Will Take Rest

London.—James Ramsay MacDonald's doctors have ordered him to abstain from all active political work for a month. The former Labor Premier is still feeling the effects of the illness which confined him to a hospital during his recent visit to the United States and will go to Scotland for a rest.

British Discontinue Convoys

London.—The Admiralty has issued a communique stating that the British naval authorities in China were discontinuing the convoy of merchant ships as firing on steamers in the Yangtze river had ceased. Destroyers will be held in readiness, however, in deal with possible recurrence of firing.

Plans Ottawa-London Flight

Ottawa, Ontario.—Captain E. L. Janney, 34-year-old Canadian flying ace, has announced definitely that he would fly from Ottawa on the morning of June 30 next in his proposed non-stop flight to London, England, to celebrate Canada's jubilee celebration.

U.S. Pilot Lost Bearings

Went 145 Miles off Route Between Montreal and Ottawa Ottawa.—After being in air for five and one quarter hours, having lost his bearings and gone more than one hundred miles off his route, Captain R. G. Hoyt, piloting a United States army goodwill plane, landed at Ottawa. In leaving Montreal the aviator mistook the St. Lawrence River for the Ottawa River, he said, and after following the former stream for some hours, came to earth to regain his bearings and discovered he was 145 miles off his route.

The final landing in the capital almost proved disastrous. The field adjoining the Dominion Experimental Farm on which the plane came to earth was rough of surface and in gliding down the plane suffered a smashed wing and badly crumpled landing gear. Both Captain Hoyt and Sergeant R. D. Bower, who accompanied him, escaped injury, however.

Manxmen to Celebrate

Possibilities of Increased Immigration to Canada Will Be Discussed

New York.—Five hundred Manxmen, now residing in Canada and the United States, called from Montreal June 2, for a four weeks home-going celebration on their native soil.

"The chief of the celebration," said Manxmen, famous for his witless cats and ancient for its self-government. Possibilities of increasing Manx immigration to Canada and the United States will be among subjects to be brought up at the celebration on the island.

NEW U. S. ENVOY IS PRESENTED TO LORD WILLINGDON

Ottawa.—Hon. William Phillips, first United States minister to Canada, formally presented his letter of credence to His Excellency the Governor-General, Mr. Phillips was presented to His Excellency by Dr. O. D. Skelton, under secretary of external affairs for Canada.

"My government awaits," said Mr. Phillips, "the establishment of my mission, to strengthen the cordial relations which have ever animated the people of Canada and the United States, confident that their association in everything that touches peaceful and orderly progress will bring new benefits to both." And these cordial words found echo both in the letter of credence from President Coolidge and in the reply of Viscount Willingdon, Governor-General. President Coolidge observed that Mr. Phillips is well informed of the desire of the United States government to cultivate to the fullest extent the friendship which has so long existed between Your Majesty's Dominion of Canada and this country."

"I am very sensible," said Viscount Willingdon in reply, "of the remarks to which you have given expression with regard to the cordial and friendly relations which have long existed between our two countries, and can assure you that both I and my government will give you every assistance in promoting our mutual progress and prosperity. We, in Canada, recognize the many advantages we have obtained from the fact that we live in close association with a great and powerful neighbor and trust that these relations may be confirmed and strengthened during your term of service amongst us."

Delightful Holiday Location

Algonquin Park, in Ontario, is one of the Dominion's charming holiday spots, particularly for the lover of fishing, canoeing and other aquatic sports. Here a canoeist is shown making his way through the passage which leads into St. Andrew's Lake, one of the beauty spots of this delightful holiday resort.—Canadian National Railways photograph.

FOREIGN POWERS SENDING TROOPS TOWARDS PEKING

Peking.—The movement of the Nationalists on Peking, ancient capital of China, and the strategic retreat of Cheng Tso-Lin, Manchurian war lord, under whose regime foreigners in the Peking district have been protected, has caused an ominous rumbling in the Chinese imbroglio. The powers are expected to concentrate allied forces for prospective purposes in the threatened area.

Japan has landed 2,000 troops at Tientsin, ready to advance to Tsian, capital of Shantung province, along the Shantung Railway, which Japan surrendered to China at the Washington conference. This advance, it is stated, will be made only if Japanese interests require protection. There are also indications from Tientsin that 2,000 additional troops will be dispatched to Peking and Tientsin if needed.

Great Britain is ready to despatch at least a battalion to Tientsin from Shanghai, and it is understood the border regiment has been selected.

The United States is moving between 1,000 and 5,000 marines from Shanghai and the Philippines to Tientsin to meet any emergency that may arise.

Practically all missionaries in the northern inland states were evacuated to the coast early in April, and a large proportion of the women and children in Peking left either for the coast or for Japan at the same time.

The Japanese expedition is adversely criticized by all factions of Chinese here, who assert it has even less justification than the British expedition to Shanghai.

International Bridge Opened For Traffic

Formal Dedication of Peace Span Takes Place in September

Buffalo, N.Y.—The new international peace bridge spanning the Niagara River between Buffalo and Port Erie, Ont., was opened to traffic June 1 with simple ceremonies of the two countries which it connects.

Promptly at the time set for the opening, automobiles containing officials of the bridge company and Buffalo public officials led by Mayor Frank K. Schwab, left the United States end of the structure for the Canadian side. There, they circled around the peace bridge plaza, picked up Canadian officials headed by Reeve Louis Douglas, of Port Erie, and returned to the American side.

Display and ceremony was lacking. That will come probably in September when at the formal dedication of the \$1,500,000 span, high officials of the Canadian and United States governments will take part. President Coolidge has been invited and sponsors of the ceremony expect the attendance of the Prince of Wales and Premier Baldwin of Great Britain as well as Canadian executives.

To Represent King at Service

London.—The Duke of Devon and Queen will be represented by the Duke of Connaught, at the great service in Westminster Abbey, on July 1, in celebration of the Diamond Jubilee of the Canadian Confederation, the Canadian Press is officially informed. Their Majesties will not be able to attend the service as they will be engaged in Scotland at that time.

Canadian Minister Welcomed in Kentucky

Addressed English-Speaking Union on "Exploits of Neighborliness"

Louisville, Ky.—The Union Jack and the Stars and Stripes politely fraternized over the heads of 150 members of the Kentucky branch of the English-speaking Union while Hon. Vincent Massey, Canadian minister to the United States, spoke on "Exploits of Neighborliness."

"I am glad English-speaking folk are learning that we may be good patriots and good neighbors at the same time," he said. He praised the English-speaking Union for its work in promoting comradeship and good feeling between peoples and paid a tribute to the Kentucky branch.

Judge R. W. Dingman, honorary president of the Kentucky organization, presided at the luncheon. He characterized England as the "most important entity in the world."

"By England," he said, "I do not mean a small island off the coast of Europe. I refer to the state of mind of the English-speaking people throughout the world who have wrought for themselves a condition of religious, political and social freedom without losing that supporting attitude toward life which is the characteristic of the race."

Getting Branch Line Work Under Way

C.N.R. Anxious to Have Lines Completed Says Vice-President

Winnipeg.—"We are forcing ahead with the branch lines," said S. J. Hungerford, vice-president in charge of operating of the Canadian National Railways, who arrived in the city from Montreal.

"As quickly as the contracts can be let, the work is getting under way," he added.

The system was anxious to get the lines completed and serving the public as soon as possible, he said, and a good deal of the work would be done this year. Mr. Hungerford was not prepared to say anything regarding new development, and knew nothing of any projected lines into Manitoba's central mining areas.

The vice-president was here on one of his periodical trips for conference with western region officials.

A Giant Photograph

New York.—A giant photograph of 22,000 square miles of Newfoundland is to be taken from the air and placed together in the most thorough search yet to be undertaken for the missing French aviators, Nungesser and Coli.

It is believed this photograph will definitely establish whether or not the crew of France's White Bird succeeded in crossing the ocean and went down in Newfoundland.

Increase in Chemical Sales

Ottawa.—Canada's chemical industry recorded an increase of \$7,500,000 in sales during 1925, as compared with the previous year, according to the Dominion Bureau of Statistics. Production by 523 plants was valued at \$120,249,518, as against \$112,000,000 for the previous year.

Premier of B.C. Recovering

Hamilton, Ont.—Hon. John Oliver, Premier of British Columbia, who was convalescing at the home of his son here for some time following an operation he underwent at Rochester, Minn., has so far recovered that he left on an automobile trip to Gray County to visit relatives.

WAR GESTURE IN RUSSIA FOLLOWS RAID IN LONDON

Moscow.—An appeal has been addressed by the central committee of all the Russian communist party organizations, declaring that the rupture of Anglo-Soviet relations is unquestionably a step towards war against the Union.

The rupture is further described as the culminating point in a long series of British diplomacy, inspiring and organizing an imperialist onslaught on the Soviet Union. It is emphasized that the Soviet Union has pursued and is pursuing a policy of peace, and that everything possible has been and is being done for the preservation of peace, despite provocations.

The appeal says that war may be forced on Russia, in spite of its efforts for peace, and calls on all members of the party and all toilers to pay the closest attention to questions consolidating the economic strength and defence of the country.

PERMIT RUSSIA TO CONTINUE TO TRADE IN BRITAIN

London.—Sir William Joynson-Hicks, Home Secretary, in a statement to the House of Commons regarding the conditions under which Russians will be permitted to trade in Britain, said that the British government had no desire to place any difficulties in the way of trade between Russia and Great Britain. Russians who desired to come to Britain for the purpose of bona fide trading, he said, would be accorded the same facilities as the nationals of any other foreign power.

The same machinery regarding visas and all other matters will apply as heretofore except that there will not be a British passport control officer in Russia. Any permission for Russian entry for purposes of trade would be on the implied understanding that the passport holder would not take part in any activities or propaganda detrimental to Great Britain.

John R. Clynes, Laborite, who brought up the question said that he thought the terms of this answer would be reassuring to the trading community.

Japan Anxious For Peace

Ready to Reduce Navy to Minimum of Defence Requirements

Tokio.—Japan's acceptance of President Coolidge's invitation to the tripartite conference on the limitation of naval armaments was inspired by a genuine love for peace and a sincere wish to co-operate constructively with the other powers, said Admiral Okada, Minister of the Navy, in an exclusive statement to the Associated Press.

He emphasized that his country was ready to reduce its navy to the minimum of naval armaments, and with this end in view would engage in a frank discussion with the delegates of Great Britain and the United States.

"If anybody thinks we simply jumped at this opportunity to limit armaments for financial reason," he declared, "he has never learned to appreciate our true feelings. Our naval institution actually far from being of aggressive propensity was never intended to extend beyond the measure justified by defence. Even without this armament parity, we never thought of building beyond this. So we are looking forward to the forthcoming conference as something in the way of a formal occasion to confirm this fundamental idea."

Grazing Permit Cancelled

Ottawa.—Experimental importation of reindeer to Badin Island has proved a failure, according to advice received by the Department of the Interior from the Hudson's Bay Reindeer Company, Ltd. For this reason, and on the application of the company, an advisory council has been passed cancelling a grazing permit originally granted to Vilhjalundur Stephansson, Canadian Arctic explorer, for reindeer and other herbivorous animals on a portion of the southern half of Badin Island.

Ban on Immigrants

Calgary.—H. B. Ashhead, M.P., East Calgary, received a telegram from the acting Minister of Immigration advising him that action was being taken to prevent sailing of additional Central Europeans likely to add to present congestion. With others, Mr. Ashhead had complained that too many immigrants from Central Europe were arriving for this district to accommodate with work at this time.

Princess Mary Christens Ship

London.—Princess Mary christened the Canberra which was launched on the Clyde in the presence of a large gathering amidst considerable enthusiasm. The Canberra, named after Australia's new capital, is the second battle cruiser built on the Clyde or Australia in a few months. The first cruiser is now being fitted out.

Approves Concession to Canada

Paris.—The Senate has adopted the bill, which has already passed the Chamber of Deputies, which approves the concession to the Canadian Government of ground in Vinny Ridge for the erection of a monument to Canadian soldiers killed in the war.

To Develop Mining Area

Winnipeg.—Two million dollars will be spent in the Central Manitoba mineral area on development work this year. Improved navigation and highways into this district are included in the activities of the Mining Bureau of the Winnipeg Board of Trade.

Vast Possibilities In Reindeer

Canadian Company With Headquarters at Vancouver Going Into Business

Raising reindeer for commercial purposes in Canada will be an established fact this year. The Dominion Reindeer Company, with headquarters at Vancouver, has imported 5,000 head of reindeer from Alaska. This herd will be located on the vast grazing areas between the Athabasca and Great Slave lakes, north of Edmonton, where the company has secured over three million acres.

The company plans to establish a packing plant at Fort McMurray and ship the reindeer meat and by-products to Edmonton for redistribution. It is stated there are vast possibilities for this industry in Canada. As yet reindeer meat is practically unknown as an article of food in the Dominion, but it is stated to be fast gaining favor in the United States.

In the last few years over 2,000,000 pounds of reindeer meat were consumed in the United States. The meat is claimed to have a flavor between that of beef and mutton. The moose, except a certain number which are set aside for breeding purposes, are fattened as steers and butchered when 2½ years old. The carcasses are then chilled and shipped to distributing points.

The cost of raising these animals is stated to be practically nil. A full grown reindeer will give 165 pounds of marketable meat. Besides meat of valuable by-products such as tongue, cheese, glue, leather, fur, buttons, knife handles, hair for life preservers and horse collars.

Reindeer herds double every three years according to authorities. Exactly 1,250 reindeer were brought in to Alaska from Siberia by the United States Government in 1902. The largest single herd of their descendants is now numbers 40,000 and the total number in Alaska is estimated at about 500,000.

The First Locomotive Whistle

Invention Came About Through Destruction of Load of Eggs

The destruction of a load of eggs on a country crossroad in 1822 was directly responsible for the invention of the first locomotive whistle according to E. W. Merderer, mechanical draftsman of the Maine Central Railroad, who said that this important piece of railroad history had been imparted to him by a prominent railroad official.

When country roads were all crisscrossed at grade and when people used to sit on their doorsteps and watch the ox carts whiz by, Mr. Merderer said, locomotive engineers had no way of giving warning of their approach except by blowing a tin horn, and naturally the engineer's lung capacity determined the volume of sound in giving warning of approaching trains.

The story as told to Mr. Merderer, was that on one spring day in 1822, a farmer approached a railroad crossing on his journey to market with a load of eggs and butter. Just as he came upon the track, a train approached. Luckily the engineer blew his horn but the farmer who so deeply immersed in pounds and dollars, shillings and pence, that he did not hear it.

Crash! Dozens of eggs and pounds of butter were transformed in a twinkling into an unrecognizable, widely distributed over the right of way.

A claim agent checked up on the case, resulting in the railroad company paying the farmer the value of his butter, eggs, fence and wagon.

A director of the company, Ashland Baxter by name, went to Alton Grange where George Stephenson lived, to see if he could not invent something that would give a warning more likely to be heard. Stephenson went to work and the next day he had a contrivance which, when attached to the locomotive boiler, and the steam turned on, gave out a shrill, discordant sound.

The railroad directors, greatly delighted, ordered similar contrivances attached to all the locomotives. This has developed into the locomotive whistle as we know it.

The British people ate on the average 37 apples a head in 1926. If they continue to increase their consumption of the fruit toward the proverbial apple a day, Canadian farmers will be gratified.

Some men waste a lot of time wishing it were tomorrow.

"To-day isn't going to marry to-day after all."

"But I thought he fell in love at first sight!"

"But he took a second look."

W. N. U. 1684

Adopting Britain's Attitude

Canada Stands With Mother Country on Soviet Question

Having taken her stand with Britain in the abrogation of relations with the Soviet, Canada will not retreat. The position of the Dominion Government is that the dramatic abrogation of the Soviet agent at Montreal for reconsideration and an opportunity to prove that Moscow is innocent of double-dealing and violation of the terms of the Trade Agreement could not be entertained for one moment.

Canada will stand shoulder to shoulder with Britain and the Dominion Government's official notification to the Soviet makes it quite clear that when the Motherland throws down the gauntlet Canada will follow. The Soviet will learn what the Russian War Lord learned in 1917; that the British Empire acts as a unit. The decision of the Canadian Cabinet to sever relations with the Moscow Reds is final.

If the Soviet wishes to buy Canadian goods the Government does not object so long as the transactions are concluded privately. But until the Soviet learns to mind its own business while enjoying the hospitality of the British Empire, the Dominion of Canada will be content to see diplomatic relations severed.

The official note was likely in more diplomatic language, but that is what it meant in plain English.

Claim Growth Stunted

By Heavy Portaging

Tribe of Indians Live on Shores of Island Lake in Manitoba

A tribe of very short, broad Indians who claim to have been stunted in growth because they have had to make long, heavy portages all their lives, dwell in isolation on the shores of Island Lake in Northern Central Manitoba.

Dr. J. F. Wright, of the zoological survey, Ottawa, who has seen some of these Indians, says the tallest of their would not be over five feet five inches high, while they are all heavily built and strong.

The Indians live in almost complete isolation at two separate villages on a strange lake dotted with about 3,000 islands, from which it takes its name, Island Lake. They rarely go as far south as Lake Winnipeg, but do all their trading with the Hudson's Bay Company at Norway House.

Dr. Wright will join Dr. J. C. R. Grant, professor of anatomy at the University of Manitoba, and the two scientists will travel together to Island Lake, the former to investigate mining possibilities in the surrounding country and the latter to investigate the physical peculiarities of these almost unknown Indians, for the national museum.

Commercial Planes For Atlantic Flights

Fokker Predicts Service Will Start Within Five Years

Anthony Fokker expresses the opinion that within five years Pan-Am flying will be on a commercial basis.

But non-stop flights, such as are being attempted now, will not be in order of the day then, he thought. These men are trail blazers, and those who follow will tread an easier road.

"I think the great circle course will be followed by these commercial planes," he said. "And there will be stops at Newfoundland, Ireland, and at London on the way."

The whole trip should not take more than 24 hours, as by that time engines will have been improved and ordinary speed raised to 150 miles an hour.

Development of better instruments and safety devices in the immediate years, Fokker asserted, would result in practically eliminating the difficulties which render now places in the way of long distance flying.

Looking for Information

A woman entered a new maid, who seemed to be self possessed and independent.

On the first morning after her arrival a rat was heard in the house, so the mistress rang the bell. There was no reply. Finally she called up the stairs:

"Are you awake, Mary?"

"Yes, rather," answered the maid.

"Why?"

"Turkey to be represented."

Up-to-Date Police Cars

Built for Scotland Yard Warfare on Motor Bandits

Twenty of the fast British motor cars which have been built to the order of Scotland Yard to help the intensive warfare planned against motor bandits will shortly be tested on the Brooklands race track before higher officials of Scotland Yard.

The cars are stated to be capable of a speed of 80 miles an hour, and each can seat six men. They are to be used solely by the Criminal Investigation Department.

Two devices are carried on all cars. One is an aluminum fire bell fixed under the bonnet and operated by a disc from the steering wheel. The other is a siren bearing the words "Metropolitan Police," which can be illuminated at night.

This device is fixed under the canopy of the car and by a switch can be made to shoot into a position in which it can be seen as the car speeds along. Ordinarily this sign will not be visible.

It has often happened that riders on distant police vans which have been chasing them. Under the new scheme the chase cars of the police will have the right of the road. The changing of the bell and the showing of the sign will warn people anxious to stop the law-breakers, and will also be a warning that any car evading the signals is likely to contain the suspected persons.

The cars will prove, it is thought, most valuable in stopping the repeated raids in the suburbs by men who return to London at the end of each raid and who have been known to sweep through police cordons.

Cannot Sue Their Clients

French Lawyers Are Bound by Ethics of Profession

French lawyers can sue everyone except their own clients, and not all of them like the situation.

Young Maurice Barreau, newly come to the bar, has brought this state of affairs to light, by blowing the dust of tradition and demanding that lawyers should have the right to collect their fees, just as they collect debts due others.

The Council of the Order, governing the Bar Association, however, still stands fast to the ethics of the profession. It shows no inclination to allow the law profession to sink to the level of mere trade, in which a businessman sues when his customers fail to pay.

Learned the Reason

Forbes Magazine tells of a colored agent who was summoned before the insurance commissioner. "Don't you know," said the commissioner, "that you can't sell life insurance without a State license?"

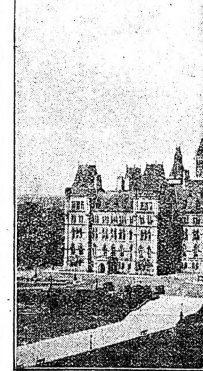

"Boss," said the man, "you such said a monthful. I knowed I couldn't sell it, but I didn't know the reason."

Interesting Youthful Stock Breeders

Following the lead taken by the Provincial Cattle Association in interesting the youthful breeders of the province in calf competitions, the horse breeders will have a like event during the Provincial Fair for boys who cared for and fed colts at least six weeks prior to the exhibition.

Aluminum, which forms a part of all clay balls, is the commonest of minerals. Its high cost compared with iron is due to the difficulty of extracting the metal from the ore.

A broken promise may be mended but it always shows the crack.

Centre of Canada's Confederation Celebration

Alfalfa For Ranching Lands

Growing Forage to Supplement Native Vegetation

Already the stock raising industry in Saskatchewan and Alberta is suffering as a result of overgrazing due to the advent of the dry farmer and the consequent reduction of ranching areas. The remedy for this situation recommended by Dr. McLeod, Dominion Agronomist, is to be found in the correct use of alfalfa. In circular No. 53 prepared by Dr. McLeod and S. E. Clark, his assistant, it is pointed out that the majority of ranchers over the area under consideration are faced with the alternative of either disposing of a portion of their livestock, or growing some forage crop to supplement the native vegetation. To assist them in following the latter plan this pamphlet has been prepared and points out that while the greater part of the ranch lands are too dry for the successful cultivation of many foreign crops, pastures have at least a small area which is favorably located with regard to moisture than is the surrounding area. On such areas irrigation is sometimes practical. In a few localities the natural water-table is near enough to the surface for such deep rooted plants as alfalfa. Here this crop does well without the artificial lying on of water. The pamphlet, available at Publications Branch at Ottawa, gives many reasons why alfalfa should be grown and how to grow it, covering soil requirements, preparation of seed, seedling during the first season, harvesting and subsequent treatment.

Population of World Increasing Rapidly

Has Doubled in Last Hundred and Twenty-five Years

According to statistics of the league of nations, the earth's population has doubled since the beginning of the nineteenth century. In 1800 it was less than \$50,000,000 while today it is in the neighborhood of 1,500,000,000. The present increase amounts to from 1 to 1.2 per cent. a year. Therefore, on the basis of 1 per cent. a year the earth's population will be in 1970 amount to 2,250,000,000; in the year 2020 it will be 4,500,000,000; a hundred years after that it will be no less than 10,357,000,000.

The epidemics and pestilences that in the middle ages decimated the population have now for many years been so abated as to have comparatively little effect upon the increase of the race.

Many U.S. Settlers Coming

The invasion of Canada by American settlers who appreciate the opportunities for farming in this country promises to be considerably greater this season than for some years. They are coming from all over the middle-western and north-western states, and it is said that some 250,000 American farmers are expected on the Canadian West or will do so during the year.

Told in Few Words

Short and snappy is the following item which appeared in a Shanghai newspaper: A reporter picked up a bomb in Chapel yesterday. He showed it to some curio collectors. He threw the bomb on the ground. He won't pick up any more bombs. They won't collect any more bombs. The account was headed: "Bomb does its stuff when treated with few words."

The London Policeman

Must Possess Some Learning to Qualify for the Learning

The London foot policeman's lot, like that of his mounted colleague, grows no happier. How would the average newspaper reader rate in the "how much do you know?" line when up against the following questions included in the "general knowledge" examination of a first-class constable?

"By what characteristics of appearance, speech, dress or manner could you tell an American, an Australian, a Frenchman or Italian in a London street?"

"What do you know about the Washington Agreement, the Third International, the British Legion, Wilbur Cullen, the Fascist and the Geneva Protocols?"

"Write short notes on any three of the following: Lord Allenby, Mr. J. H. Thomas, E. Henderson, Mark Twain, Signor Mussolini, Marie Curie, Jack Dempsey, M. Trotsky." The examination includes a searching problem in psychology: "Is there any truth in the statement that the criminal is born, not made? Illustrate as far as you can from your own experience." After this one be asked to understand why Sir Leonard Dunning, inspector of constabulary, in his annual report to the home office, asked the public not to offer tips to policemen, who may be classed scholars as well as illiterate, and one learns without surprise that not a few men who regulate the traffic in London streets, and so politely answer so many perplexing inquiries, are university graduates.—New York Herald-Tribune.

Good Country for Canoeists

No Other Place Offers Such Attractions as Canada

Never a country had such a canoe and never canoeists had such a country as Canada. At hundreds of railway stations and steamboat landings the canoeist can drop his craft into the water and in an hour have passed 50 miles into the wilderness that apparently no mortal more modern than the hollow of the mouse or the cry of the loon has ever broken its primal stillness. Alarm clocks and telephones and suburban trains are forgotten, time is measured by meals and sleeps; for what an appetite even a dyspeptic has on a canoe trip and how the rhythm of city sleeplessness enjoys that blissful slumber on a "couch of new-pulled blanket" in the wilderness!

Longest Canal Tunnel Opened

The longest canal tunnel in the world, connecting the Port of Marseilles, France, with the large inland salt water lake Etang-de-Berre, has been formally opened. Marcelles, thus brought into direct water communication with the River Rhone. The tunnel is four and a half miles long, 47 feet high and 50 feet broad. Seagoing vessels are able to proceed through it.

Prince Has Many Doubles

Doubles of the Prince of Wales are numerous, and another has turned up this time in London. People cannot help looking like His Royal Highness, but some of them take advantage of the fact. It is not unusual for the Prince to receive bills for meals, and so on at places where the Prince has never entered in his life. He must have at least seven or eight doubles.

Gods are no use for people who refuse to furnish material for them.

Warning To Bolshevism

United States Ambassador to France Refused to Aid Propaganda

The United States ambassador, Myron T. Herrick, speaking at the United States military cemetery at Surmene, France, declared the ruling powers of Soviet Russia were engaged in paid propaganda activities throughout the world and that the United States would not tolerate the spread of Bolshevism to its shores.

Declaring modern scientific methods were being applied to the scourge of war, the ambassador said these modern scientific methods are now "somewhat belatedly being actively applied to the scourge of Bolshevism."

"I believe," he continued, "that the people in every country have got to choose between order and anarchy, between honesty and thievery, between everyday virtue and crime. Either we believe in orderly society or we don't. If we do, we ought to use all the power within us to defend and advance it. The impudent, mischievous interference of paid, organized propaganda throughout the world has gone steadily on and, in common with others, I have been forced by these events to view with increasing apprehension this sinister movement."

Declaring the leaders of the Soviet regime do not speak for the great masses of Russian people, Mr. Herrick said the Bolshevik system thus far seems to be in general more tyrannical and oppressive than any preceding despotism.

"We have no thought of attacking the Soviet regime in Russia. What it does on its own 'reservation' is its own affair. But we do object with all the earnestness of a self-respecting nation, and quite regardless of material considerations, to give to its leaders the means and opportunity of poisoning us. We intend to protect our country from Bolshevism and the fact that a Government secretly sends against us the germs of a loathsome malady instead of openly dispatching armies does not make the invasion less felonious or alter our duty to repel it."

Eskimos Enjoy Radio Program

Reception Is Usually Very Good Near Arctic Circle

In far away Aklayuk, somewhere near the Arctic Circle in the North West Territories, the Eskimos no longer huddle at night in their igloos. For in Aklayuk, 1,500 miles north of Winnipeg, voices from Canadian radio stations make themselves heard on certain nights when Aurora Dorcas is in good humor. Then the dogs cease to howl at the painted sky and the tumult flappers and sheiks gather on the frozen snow to dance to strains of orchestra.

Lieut. Kluff, who is stationed at Aklayuk on government work, sends this information by telegraph to the Manitoba government station.

The lieutenant has a good radio set with a loud speaker, and on nights when conditions are favorable he tunes in Reception is usually good, he says, and the concerts are much enjoyed.

The Eskimos, he says, are keen fans and look forward to the coming of the "voice from the sky." As the Eskimo, as a rule, is keenly appreciative of white men's music and quickly learns to dance in the modern way, they thoroughly enjoy the concerts and dance music, Lieut. Kluff writes.

Suited to Timber Crop

Only Economic Use for Three-Eighths of Canada's Land Area

It is estimated by the Forest Service of the Department of the Interior that the only economic use for three-eighths of the land area of Canada lies in growing of trees. This vast area of territory, while incapable of successful agricultural production, is, if permanently dedicated, protected and managed, suited to the production of a timber crop which would guarantee for all time the supply of raw material for Canada's wood-using industries.

Camels Once Roamed Over America

Camels are commonly understood to belong exclusively to the Old World. It was not always so, however, as a specimen recently acquired by Canada's National Museum, at Ottawa amply demonstrates. This is the fossilized frame of a camel which lived in the western plains of North America which were then dry. This curious specimen has been placed on exhibition in the Hall of Paleontology.

The Rev. Mr. Smythe—"Of course you expect to go to heaven?"

Jones—"No, it will be just my luck to have to live in one of the suburbs and commute."

COPYRIGHT, CANADA, 1925

CHAPTER I

It all began with the rustle of silk.

When Helmi's Aunt Lili came back to Finland for a visit, after six years of the crowded ways of life in America, the older women-folk of her family regarded her with mingled feelings of awe, envy and reproach. Her elder sister, Helmi's mother, said it was foolishness for a girl who had to earn her money, hard, carrying trays, to put it all on her back and wear clothes that only queens should be wearing. At which Aunt Lili laughed, showing her gold teeth, and said it was a matter of principle with her to spend her money so fast that no one could steal it from her. Helmi was the one member of the family who gave the visitor full hearted and unmitigated devotion. She loved the rich sound of her silver skirts, it was so luxurious, so shiny, it seemed to raise the whole family to a higher social level, and she marvelled how anyone, even her mother, would dare to find fault with this wonderful person who wore silk stockings, had fur on the inside of her coat, and pink ribbons in garments that did not show at all!

Aunt Lili had not spent all her money on her own clothes. To Helmi's mother she had brought a purse which closed with a crack. It had a head on one side, and two claws which could be flapped on the other side; gold satin lining; mysterious chambers inside; and better than all was the delicate lace once it conveyed regarding women and money. To Helmi's father she brought a silk handkerchief with wetted roses on both sides, a sort of magic handkerchief, for no matter how hard it was squeezed in one's hand it would spring out again without even a wrinkle. To Aunt Lili's big sister, who had her hair in bangs, she brought a square bottle of powder the color of skin, and a round daisy thing to put it on with. Aunt Lili used a black sock for this purpose, but she said powder-puffs were certainly still in America now.

Aunt Lili made many contrasts between America and Finland. "You work too hard here," she said, "and you never play. No work in America, but we have good times. This country is all right for men, but what is there for women but raising children and work? When a woman here is married ten years she is old, and her life is over. It is all just giving in, and giving up, for women, until at last they give out. I wouldn't live here if you gave me the whole country. I couldn't stand it now after

Helmi with her golden hair, and eyes the color of the green brown moss in the bottom of the running pure at home. "Oh, just enough time to see Helmi and tell her things—please—please—"

And so the frightened Helmi, who had expected to be met by the Great Person who had brightened her childhood, came into the dark and dreary room, whose only vivid spot was the white face on the soiled pillow with its two burning eyes.

"Don't kiss me, Helmi. Ahn't it awful? It is a bad disease I have which goes from me. I thought it was just a cold like I often have, but it's worse than that. Anyway, I only want to see you and tell you. Don't stay with Mike. He says he will keep you. You do not owe him the money—it was mine. He wants you because you are young and pretty. The girls tell me he's acting bad already, and me not dead so soon. I have money enough to send you back, Helmi, that will be best. You know what is ahead of you at home. It might be worse. You will go back, won't you, Helmi?" Helmi fell on her knees beside the bed.

"But isn't it a good country, Aunt Lili, like you said? Can't I get along like you did?" she sobbed. "I can work, Aunt Lili, like you did."

"It's a good country, Helmi," said Aunt Lili when she could speak. "Just like I said, only men are so bad, and it's hard for a young girl alone, and I was so afraid for you. Men just want their own pleasure. Mike was good to me while I could sport around and dance, and while I did not say a cross word to him for what he did to me when they don't drink. He takes their money, Helmi! I can't stand that. I threatened him I'd go and tell, and then he struck me with a chair. He never comes to see me now, Helmi, and he made me take this room above the bar because when people pay for rooms they want to sleep. He says, 'You're awake, anyway, with your cough, so what's the odds?' Helmi, men are queer and all for self. The trouble started when my little Helmi was on the way. I had her named for you. Men do not like kids, they're too much trouble. He was mad and cross at me because I was not young and was sometimes sick, and when little Helmi came she only lived a day, and he was glad. Then I hated him, Helmi—I hate him now, and am always sometimes sick, and when one is going to die, but I cannot help it, Helmi, I wanted to warn you you do not get mixed up with men—they break your hearts."

(To Be Continued.)

Seek Sunken Treasure

Divers to Plumb Depths of Dangerous Reefs off the Coast of France

Sunken treasure, reputedly a huge fortune, is the goal of divers who seek to explore the dangerous reefs off the Isle d'Oleron, off the west coast of France. The treasure consists of many boxes of diamonds, gold and other precious metals sunk in the wreck of the three-masted schooner "Joune Henri" December 5, 1820.

The fortune was the result of the thirty year residence in the United States of the Count de St. Paul, lord of the Vendee, who fled to the United States during the French revolution. For years he submitted to the usual tribulations of the pioneer, but finally lucrose investments brought him an immense sum of money. Then he decided to return to his native country.

The count and his family escaped when the "Joune Henri" was driven on the reefs of Oleron, but the gold was lost and the wealthy emigre died a short time later in poverty. Now an enterprising company of divers is seeking to locate the treasure.

Had All of Them

A man wearing a warped look went into a shop which advertised a patent exterminator, and asked for a hundredweight.

"Certainly, sir," said the amazed assistant, "but that quantity would be sufficient to destroy all the slugs in the Queen's County."

"I know that," was the reply. "They are all in my garden."

Sea water looks blue on a clear day because it reflects the color of the sky.

Moderation in Exercise

If Carried to Excess it May Become Dangerous

Do not envy Samson or Hercules. The strong man, says an expert adviser, is often the one who weakens first in the struggle for life. The man with moderate physical strength is the one who is likely to retain his health the longer and to get more enjoyment out of life.

A man who devotes much of his time in training his muscles to an exaggerated development, expecting at the same time to acquire a robust constitution, is making a double mistake. In the first place, he injures his health through over-exercising, and then his muscles assume a grotesque appearance which shocks the artistic eye.

If one observes the statues of ancient Greece, he will notice at first sight that there is no exaggeration in the size of the muscles. Proportion and beauty demand moderation.

Athletes practiced in moderation produce beneficial results, while if it is carried to excess it becomes disastrous. The man who is gone to waste through overtraining will, sooner than he thinks, have to pay the penalty of his greediness.

Boys and young men seem to have a natural admiration for athletes. Nothing is more difficult than to discourage a boy who has made up his mind to become an athlete. For this, parents are largely to blame, as they often are an athlete to their sons, as an ideal of manhood. It is rather remarkable that very often an athlete is a man of mediocre intellectual development.

If the following question is asked: What are the physical exercises recommended as likely to develop at the same time the body and the mind—"mens sana in corpore sano"—the bureau of statistics of my life insurance company will give the following answer: "If you group up boys and young men, exercise in the open air in the form of games and plays, will contribute more than anything else towards obtaining a sound and healthy body, capable of prolonged endurance. For men of a more advanced age, especially those of sedentary habits, light gymnastics, if possible in the open air every morning, will suit the purpose."

When Holloway's Corn Remover is applied to a corn it kills the roots and the callousness drops out without injury to the flesh.

Soviet Propaganda

Decision is Reached to Give Further Support to Chinese Revolution

London, June 25.—A more intensive campaign in support of the Chinese revolution, and to appeal to the workers of the world to assist Soviet Russia to sabotage other nations in the coming "inevitable" war, was reached at Moscow by the executive committee of the Third International.

The committee declared that its sections have shown far insufficient support of the Chinese revolution, and therefore, proposes that the latter take resolute measures. Increasing propaganda in the press; active work among the trade union organizations; propaganda in colonial countries, and propaganda among soldiers on route to China.

National Dairy Show at Memphis, Tennessee, will be the site of the 1927 National Dairy Show in the United States, the date being October 15th to 22nd. It will be a long distance for Canadian exhibitors to travel if dairy breeders here decide to maintain their previous honors at this show. In 1925 the show will be held at St. Louis, Missouri, where Canadian breeders were particularly successful in 1901.

Mrs. Parque—"You—you—you—you!"

Peacock—"Quite right, my dear. You're always making me shell out."

Campers—Take Minard's with you.

Would Circle the Globe

Colossal Number of Papers Printed Every Week on Boulevard Street, London

For many years the "News of the World" has been produced in Boulevard street—a comparatively short thoroughfare leading southwards from Fleet street to the Thames embankment.

Despite its size, Boulevard street produces more newspapers than any other street in the world. If the pages of the papers sent out of this small thoroughfare in a week were placed end to end they would circle the globe.

The vast weekly issue of the "News of the World" would provide a quarter of this belt, for, if the pages were placed end to end, they would make a pathway from London, across the Atlantic, across the United States, and a few hundred miles out into the Pacific Ocean on the way to Japan.

About 25,000,000 newspapers are published in Boulevard street each week, making a breakfast-table total of 1,200,000,000 copies per annum. To get the 4,000,000 copies of the "News of the World" to be distributed over the length and breadth of the British Isles on Sunday morning and over the rest of the world as fast as great liners can carry them, the huge battery of printing presses must produce copies of the "News of the World" at the rate of 7,000 per minute, or 420,000 per hour.

Each issue requires 500 tons of white paper, 16,000 lbs. of black ink, and to tie up the parcels, 70 miles of string.

A new building in course of completion will be the most modern in existence.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from alcohol or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armitage, R. N., 1, South Moulton, Ont., says:—"We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make feeding easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Will Grow Tobacco at Coast

Possibilities of Growing Leaf in B.C. to be Tested

Possibilities of the British Columbia coast as the centre of a large tobacco growing industry will be tested out this year as a result of experiments sponsored by T. E. Coventry, member of the Provincial Legislature. Seed has been imported and is being grown on two half-acre experimental plots at Saanich. One will be irrigated and the other worked without irrigation to test out the best method of production.

Wise mothers who know the virtues of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

Nova Scotia, in its Cape Breton part, is the most Scottish county in the world outside of Scotland.

Killing time may mean the suicide of success.

Ease sunburn with Minard's Liniment.

Samuel L. Clemens, better known as Mark Twain and much beloved, made a real contribution to the youth problem of our day, when he said, "If you would train up a child in the way her should go, you have got to go that way yourself."

TO WOMEN OF MIDDLE AGE

Mrs. Wilson's Experience a Guide to Women Passing through the Change of Life

Hamilton, Ontario.—"I have taken several bottles of Lydia E. Pinkham's Vegetable Compound and I cannot speak too highly of it as it has brought about the change of life and was all run-down and had no appetite. I was very weak and sick, and the pains in my back were so bad I could hardly move. I got very sad at times and thought I had not a friend on earth. I did not care if I lived or died. I was very nervous, too, and did not go out very much. My husband advised me to try a bottle of Lydia E. Pinkham's Vegetable Compound, so I did. I am a farmer's wife, and always worked hard until lately, and was in bed for two months. I began to feel like a new woman after the first bottle and I recommend it with great success, also Lydia E. Pinkham's Liver Pills. I am willing to answer letters from women asking about my medicines, as I cannot speak too highly of them."—Mrs. EMMA WILSON, 471 Wilson Street, Hamilton, Ontario.

How Birds Sleep

"Very few laymen can understand why a tree-perching bird does not fall off a slender branch when it goes to sleep and becomes unconscious. The bending of the knees in the act of sitting down tightens the muscles of the toes in such a way as virtually to lock the sleeping bird to its perch, and it cannot leave until they are straightened and the muscles of the toes are relaxed," writes Mr. Richard Keanon in the National Review.

"Another phase of the matter

which puzzles the popular mind is, Why do birds puff out their plumage when going to sleep? This is done in order to retain the heat of their bodies. Air is a bad conductor, and by entangling a certain amount of it between their feathers it is kept still and acts the part of a wrapper. In order to prove this it is only necessary to mention that two light overcoats will keep a man's body warmer during a cold winter's day than a single heavy one. The entangled air between the two garments prevents the natural heat of the man's body from escaping."

Wedding Ceremony at St. Stephen's Is Pretty Event

St. Stephen's rectory, beautifully decorated with ferns and carnations, was the scene of a simple but charming wedding on Tuesday, June 7, at 4 o'clock, when Mildred Adeline, daughter of Mr. and Mrs. Robert W. Hamon, of Moose Jaw, Sask., became the bride of Mr. Henry Longhurst Gale, of Vancouver, formerly of Calgary. Canon James performed the ceremony.

The bride, who was given away by Mr. L. F. Ormond, wore a georgette travelling gown in three tones of fawn with long sleeves, and a fawn coat with darker fawn fur collar. She wore a large picture hat to match and carried a colonial bouquet of Madame Butterfly roses. Miss Betty Mitchell, who was the bridesmaid, wore a smart grey tailored suit with a small green ribbon hat and wore a colonial corsage of mauve sweet peas. Mr. Sidney Stevens supported the groom.

Mr. and Mrs. Gale are both well known in the city and are graduates in law from the University of Alberta. Mrs. Gale has been much feted by her friends in the city previous to her marriage. The popular bride and groom will make their home at the coast in future.—Calgary Herald.

Many Diamond Jubilee Celebrations

Special celebrations commemorating the Diamond Jubilee of Confederation will be held in some sixty communities, large and small throughout the province on July 1, according to information secured by the central committee in Edmonton. Literature has been sent out by the committee to all mayors, Reeves and school teachers in the province in order to have this occasion celebrated as widely as possible.

Wheat Pool Meeting at Clover Leaf

A meeting of the Clover Leaf Local of the Wheat Pool was held at Clover Leaf School on Saturday for the purpose of discussing Pool affairs and to receive nominations for a delegate. S. W. Warren and N. D. Stewart were nominated. Mr. Stewart being elected. A resolution was also passed at the meeting. "That this Local strongly recommend L. S. Dawson as buyer for the Pool elevator now being erected at Chinook."

Meeting of Chinook Women's Institute

The monthly meeting of the Chinook Women's Institute was held last Thursday afternoon at the home of Mrs. C. W. Rideout. A very interesting paper on "Immigration" was read by Mrs. R. Stewart. Mrs. F. F. Tracy, who was delegate to the annual convention at Edmonton, gave a splendid report of the convention, and at the close of her report she received a hearty vote of thanks.

As Mrs. Tracy is leaving the district soon, she tendered her resignation as president of the Women's Institute. Mrs. Dobson as first vice-president and Mrs. Jacques as second vice-president thus becoming president and vice-president respectively.

An invitation from Mrs. Stewart to come and visit her at her home on the farm on July 22 was cordially accepted by the Women's Institute.

Owing to the holiday season, the next regular meeting of the Institute will not be held until September.

Meeting of Chinook Village Council

The regular meeting of the Chinook Village Council was held in the office of the Secretary on Saturday evening.

Apart from the passing of a number of accounts very little new business was done.

The Secretary was instructed to write J. R. Miller requesting that he either fill in the cellar on Lot where the store was destroyed by fire or fence same around.

A grant of \$25.00 was given to the Chinook and District Agricultural Society.

SIGN-UP DRIVE

The machinery for the campaign to put over the sign-up of the Second Series of Wheat Pool contracts has been put in motion. The drive will start on Monday, June 20, and it is planned to conduct a thorough canvass of the province.

The success with which co-operative wheat marketing in Canada has met during its brief history has won wide-spread admiration for the Pool organization. The possibilities for the future are vast. The great majority of Alberta people are interested in seeing a continuation of the Wheat Pool method of marketing.

The same reasons for the formation of the Wheat Pool in 1923 are applicable today. The Alberta farmer, without the assistance of the Pool, would be in a much worse position. The best interests of the entire province demand a continuation of the Pool system of grain marketing.

At the Rex Theatre, Youngstown next Tuesday and Wednesday, June 14-15, Charlie Murray and Chester Conklin in "McFadden's Flats." This is a special comedy feature and worth seeing.

Service will be held in Chinook United Church next Sunday morning at 11.30.

Canadian National Sixth Annual Tour To the Pacific Coast

In pursuance of a time-honored practice of affording its patrons every facility and convenience tending toward more vacation enjoyment, the Canadian National in operating its sixth annual tour confidently believe this will again prove of the greatest aid and convenience to a host of teachers, as well as to professional men and business men and women, vacation-bent.

The tour will commence at Winnipeg, from which point a special train of modern sleeping car equipment, dining car and radio observation car, will leave July 4th. The party will be personally conducted by an efficient and experienced representative of the Canadian National.

After stopping at various points of interest, the train will arrive at Prince Rupert on July 9th. At this latter point the party will embark on a palatial steamship for a cruise of 550 miles through the famous "Inside Passage" to Vancouver. While the tour terminates at Vancouver, those who desire to make a trip to Victoria may have their tickets read "Victoria" as their destination without any additional cost.

This mode of travel has many advantages. In the first place, it is planned with a view to including in the itinerary the most interesting points, which, with the other arrangements that are made, obviates the necessity of the passenger worrying about connections, sleeping car accommodation, meals, and entertainment en route. This is all done in advance by experts, leaving the passenger free to enjoy to the full the scenery and attractions attendant to such tours.

The local agent of the Canadian National Railways will be pleased to give you full particulars of this tour.
